Dear Ms. Barnett:

Subject: Label Amendment to Delete Uses to Remove from Scope of
 WPS
 Weed Ender
 EPA Reg No 17545-6 ✓
 Your Submissions Dated July 19, 1994

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable provided that the following changes are made:

- (1) Under Ornamentals, delete "turf".
- (2) Under Caution, change "turf" to "grass".
- (3) Under Environmental Hazards, change the second sentence to "Do not apply directly to water." (i.e., delete "or wetlands").
- (4) In comparing this label with the last accepted one, we note a discrepancy in the area covered with 1/2 pint Weed Ender (582 vs 562 sq ft). Please assure that the correct number appears on your final printed label.

A stamped copy of your label is enclosed for your records. Please submit 2 copies of final printed labeling before you release the product for shipment.

Sincerely,

Cynthia L. Giles-Parker
 Product Manager (22)

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in any manner inconsistent with its labeling.

GENERAL DIRECTIONS: To prepare spray solution, fill spray tank with recommended amount of water. Add WEED ENDER as recommended below and mix thoroughly by shaking or other agitation. If mixed spray is allowed to stand for any length of time, it should be shaken or agitated before using.

WEED ENDER	Water	Area Covered
1/2 pint*	2 - 2 1/2 gallons	582 sq. ft.
1 pint	4 - 5 gallons	1,125 sq. ft.
2 pints	8 - 10 gallons	2,250 sq. ft.

542?

*Equivalent to 8 fluid ounces or 16 tablespoonfuls

Apply WEED ENDER to top-kill actively growing, undesirable annual and perennial weeds by thoroughly wetting foliage to run-off. However, certain hard-to-kill species, such as Bermudagrass and Dallisgrass, may require repeat applications. Should re-growth occur, retreat as needed at 5-day intervals. Sunshine and temperatures above 80°F will enhance effectiveness.

- DO NOT allow spray to drift onto desirable plants.
- DO NOT use WEED ENDER on vegetable gardens.
- DO NOT track from treated areas onto lawn

NON-PLANTED AREAS: WEED ENDER may be used for general weed control or as a liquid edger around buildings, storage areas, vacant lots, patios, walkways, driveways, curbs, and fences.

ORNAMENTALS: Apply WEED ENDER as a directed spray to unwanted vegetation or turf around ornamental plants, shrubs, and trees. Avoid spray contact with foliage, stems, or bark of desirable plants.

LAWN ESTABLISHMENT AND RENOVATION: WEED ENDER may be used to destroy weeds before lawn establishment or weeds and existing lawn before renovation. For best results, mow weeds or lawn to about 1" height before treatment. Apply WEED ENDER according to the above table. If needed, repeat application as indicated above 5 days after first treatment.

Caution: Delay reseeding for at least 5 days after last application. Dead vegetation need not be removed unless matted turf or thatch prevents lawn seed from making soil contact. Precede reseeding by heavy watering treated area. Seed may be worked into soil, if necessary, by scarifying or raking. A light top dressing of screened peat moss will help retain moisture during seed germination. Keep reseeded area moist.

STORAGE AND DISPOSAL:

STORAGE: DO NOT store near food or food products.
DISPOSAL: DO NOT reuse container. Securely wrap original container in several layers of newspaper and discard in trash. Clean sprayer with water and discard rinse water onto sprayed area.

**BEFORE USING ANY HERBICIDE,
STOP AND READ THE LABEL**

WEED ENDER

Contact Weed and Grass Killer
Non-Staining - Odorless
Covers up to 2,250 sq. ft.

For homeowner use on non-planted areas or as a liquid edger and around patios, curbs, fences, walkways, driveways, trees and shrubs.
