Do not use in areas where children or domestic animals are present. Do not use in areas where children or domestic animals are present.

THROW - PACKS

SUGGESTED DIRECTIONS:

RAIS: Place 1/2 oz. of bait in plastic container known to rat or mouse. Place container in areas where rats or mice are known to travel, along walls, near windows, and in other areas where they may be exposed. **WITHOUT PREPARING PLASTIC BAG, BE SURE IT IS INACCESSIBLE TO CHILDREN AND DOMESTIC ANIMALS.** Place bait behind planks nailed to wall or floor, where rats can feed without being observed. Check baiting should continue until complete lack of feeding is noted. Daily inspection of bait is essential. When the bait is used, bait supply should be replenished with a continuous food supply. What gives results? Baiting is difficult but to complete entire baiting program, these packs left untouched for 4 or 7 consecutive nights should be another baiting.

MICE: Place 1/2 oz. of bait in plastic container known to mice. Place container in areas where mice are known to travel, along walls, near windows, and in other areas where they may be exposed. **WITHOUT PREPARING PLASTIC BAG, BE SURE IT IS INACCESSIBLE TO CHILDREN AND DOMESTIC ANIMALS.** Place bait behind planks nailed to wall or floor, where mice can feed without being observed. Check baiting should continue until complete lack of feeding is noted. Daily inspection of bait is essential. When the bait is used, bait supply should be replenished with a continuous food supply. What gives results? Baiting is difficult but to complete entire baiting program, these packs left untouched for 4 or 7 consecutive nights should be another baiting.

NOTE: Do not use in areas where children or domestic animals are present. Do not use in areas where children or domestic animals are present.
