

Used as directed, this product will aid in controlling and/or preventing the development of unsanitary algae lime conditions which are unsightly, produce foul odors and which are often the cause of equipment breakdown.

This product is compatible with virtually all corrosion inhibition additives, but should not be used in the presence of soap or other anionic detergents. At use dilution it is non-corrosive to inanimate hard surfaces.

**DANGER:** Keep Out of Reach of Children. Corrosive. Causes severe eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Protect eyes and skin when handling concentrate. Harmful if swallowed. Avoid contamination of food.

**FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash all contaminated clothing before reuse. If swallowed, drink milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Call a physician.

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

**FISH AND/OR WILDLIFE PRECAUTIONS:** This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on label.

**DIRECTIONS FOR USE**

Apply this product when the system is in jeopardy of becoming affected or after cleaning system whose efficiency is already impaired.

**Initial Dose:** 1-2 gallons of this product to each 5,000 gallons of water contained in the system (20-40 ppm active quaternaries). Repeat until control is evident.

**Periodic Dose:** When system is in control, add 1-3 quarts of this product to each 5,000 gallons of water (5-15 ppm active quaternaries) contained in the system every 7 days or sooner should visible growth appear.

For best results, clean heavily contaminated systems before treatment. If soap or anionic detergent is used, rinse thoroughly before charging with this product. Apply product at a point in the system where uniform mixing will take place.

Do not be alarmed with the sudden appearance of organic debris in the system during the first week of operation. This is normal and is a good indication that the product has effectively penetrated and dislodged dead organic material which tenaciously adheres to metal and wooden surfaces as living matter. This debris should be removed from the system to avoid clogging of screens and pipes.

**Rinse empty container thoroughly with water and discard.**
