NOTICE OF PESTICIDE

REGISTRATION
BY REREGRISTRATION

FEDERAL INSECTICIDE, FUNGICIDE,
AND RODENTICIDE ACT, AS AMENDED

NAME OF PESTICIDE PRODUCT

Chem - Clear

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Midwest Pool Supply, Inc.
P. O. Box 620526
Middleton, WI 53562-0526

BEST AVAILABLE COPY

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

1. The word "Warning" should be changed to "DANGER" on the left panel.
2. The heading "First Aid Treatment" should be changed to read: "Statement of Practical Treatment (First Aid)."
3. Revise the ingestion statement to read: "If swallowed, drink large amounts of water. Do not induce vomiting. Call a physician or poison control center immediately".

ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL

DATE

4. Change the active ingredient declaration from 11.6% to 12.5%. Change the inert ingredients from 88.4% to 87.5%.
5. Note the correct spelling of "hypochlorite" beneath the product name.
6. On the front panel, include the referral statement "See left side panel for additional precautionary statements".
7. Revise the "Environmental Hazards" statement to read:

"This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Following the sentence, "This pesticide is toxic to fish and aquatic organisms," you may instead use the text indicated in PR Notice 93-10 (copy enclosed), since that text will be required as indicated in that Notice.

8. Revise the Storage and Disposal statements in accordance with the enclosed Errata Sheet for PR Notice 84-1.

A stamped copy of the product label is enclosed for your records. Submit one copy of the final printed label before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

CHEM - CLEAR

SODIUM HYPOCHLORITE SOLUTION FOR

SWIMMING POOL

BACTERIA AND ALGAE CONTROL

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS (AND DOMESTIC ANIMALS)

WARNING: May cause severe eye and skin irritation. Harmful if swallowed. Do not get on skin, in eyes or on clothing. Wash thoroughly after handling. Remove and wash contaminated clothing before use.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams and ponds unless a discharge permit is obtained.

PHYSICAL AND CHEMICAL HAZARDS: Mix only with water according to label directions. Do not mix with other products or chemicals (such as household ammonia, detergents or acids). To do so will release hazardous gases. Use only in well ventilated areas. Organic contamination must be removed by washing and rinsing with recommended use dilutions. Vacate treated areas as soon as possible and do not return until vapors and odors have dissipated.

Net Contents 5 Gallons.

DIRECTIONS FOR USE

It is in violation of federal law to use this product in a manner inconsistent with its labeling.

CHEM-CLEAR may be poured directly into the pool water or fed through standard Hypochlorinating equipment. When added directly to pool water, distribute around perimeter of pool and allow time for mixing before checking residual.

Initial Treatment: For freshly filled pool, maintain Chlorine residual between 0.6 and 1.0 ppm. Add - 1 cup (8 oz.) CHEM-CLEAR per 10,000 gal. water. If desired level is not achieved, add 1 oz. CHEM-CLEAR per 10,000 gal. water to raise residual level 0.1 ppm.

Maintenance: Add 8 oz. CHEM-CLEAR per 10,000 gal. water daily, or as needed. Variances in temperature, number of swimmers, degree of sunlight, etc. effect the requirement of disinfectant.

Note: Product degrades with age. Use a suitable test kit and increase dosage as necessary to obtain the required level of available chlorine. Frequently test the pH of the water and maintain a reading between 7.2 and 7.6.

SUPERCHLORINATION

To Superchlorinate - Add 1 gallon CHEM-CLEAR per 10,000 gal. water. Add total amount at one time; This should be done at night or when pool is not in use. There will be an initial high residual reading (5.0 to 10.0 ppm). Vacuum the pool of all dead algae. Do not use the pool until residual level drops below 3.0 ppm, as determined by test kit. Superchlorination is recommended once weekly for heavily used commercial pools and once every two weeks for residential pools receiving normal use.

Storage and Disposal

This product must be kept in locked storage sufficient to make it inaccessible to children or persons unfamiliar with its proper use. Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Pesticide or rinsate that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides. Consult federal, state, or local disposal authorities for approved alternative procedures.
