

Sunbeam Humidifier Water Treatment is a refreshingly scented bacteriostat designed for use in evaporative humidifiers only which, when used according to directions, can help control the buildup of bacteria and algae in water tanks of portable home humidifiers.

Directions

Be sure humidifier water tank and filter are thoroughly cleaned before each heating season. Please follow the manufacturer's recommendations for the method and frequency of cleaning the humidifier.

For every gallon of water contained in the humidifier tank, add no more than one capful (1/6 of a fluid oz.) of Humidifier Water Treatment. Fill cap to top of inside cap threads. For example, if your humidifier holds 9 gallons of water, and the tank is full, add 9 capfuls. When refilling, add only one capful of the Water Treatment for every gallon of water added.

Warning

Keep out of reach of children. Causes eye and skin irritation. Do not get in eyes, or on skin or on clothing. Harmful if swallowed. Avoid contamination of food.

Do not use on atomizing or vaporizing types of humidifiers. If you are not certain as to the type you have check with the manufacturer of the unit you have.

First Aid

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash all contaminated clothing before reuse. If swallowed, drink milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Call a physician.

Rinse empty container thoroughly with water and discard.
