**Pool Power Algaecide** controls the growth of all kinds of algae in swimming pools. For maximum effectiveness, the algaecide must be uniformly mixed throughout the pool water. First dilute proper dosage of concentrate with water. Then apply this solution through a sprinkling wand into the water around the edge of the pool.

**CAUTION:** Concentrated **Pool Power Algaecide** may be harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact, flush with plenty of water for at least 15 minutes. Should eye irritation persist, get medical attention. Avoid contamination of food. Empty container should be rinsed thoroughly with water and discarded.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.

**DOSAGE FOR NORMAL POOL** (free of visible algae): Maintenance dosage of 2 to 4 fl. oz. of **Pool Power Algaecide** per 10,000 gal. of pool water every 5 to 7 days.

**JUST FILLED POOLS.** If the pool is clean and has been filled with clean water, give it an initial dose of 6 to 11 fl. oz. of **Pool Power Algaecide** per 10,000 gal. of pool water.

**POOLS WITH VISIBLE ALGAE GROWTH.** Apply dose of 11 to 17 fl. oz. of **Pool Power Algaecide** per 10,000 gal. of pool water. Remove settled algae debris by vacuuming.

**VERY DIRTY POOL WITH HEAVY ALGAE GROWTH.** Vacuum, clean and scrub walls. Then dose with 11 to 17 fl. oz. of **Pool Power Algaecide**. Vacuum again to remove dead algae sediment.

**DO NOT MIX CONCENTRATED POOL POWER ALGAE-CIDE** with any other concentrated chemicals... dry or liquid.

When properly used, **Pool Power Algaecide** is compatible with the chlorine normally used to treat pools. **IT IS EFFECTIVE AT BOTH ACID AND ALKALINE PH.** If an algae problem is treated with chlorine, a small amount of **Pool Power Algaecide** will help control algae growth.

NET CONTENTS 32 FLUID OZ. (1 QT.)

Manufactured by Pool Power Products, a division of Bakers Food Products, Inc., 718 W. Grange Ave., Milwaukee, Wis. 53221.

**POOL POWER!**  
**ALGAE-CIDE**

ACTIVE INGREDIENTS  
 Dichloro-2,2,2-trifluoroethane 10.0%  
 Dichloro-1,1,2-trifluoroethane 10.0%  
 Methylisothiazolone 10.0%

INERT INGREDIENT 40%

Really works!  
 Controls growth of algae.  
 Non-foaming.  
 Effective at any PH.  
 Economical. Can reduce normal chlorine requirements.  
 Non Metallic.

Good Housekeeping  
 GUARANTEES  
 REPLACEMENT OR REFUND TO CONSUMER

**ACCEPTED CAUTION**  
**KEEP OUT OF REACH OF CHILDREN**  
 USE ONLY AS DIRECTED.

**Pool Power Algacide** controls the growth of all kinds of algae in swimming pools. For maximum effectiveness, the algacide must be uniformly mixed throughout the pool water. First dilute proper dosage of concentrate, nine to one with water. Then apply this solution through a sprinkling can into the water around the edge of the pool.

**CAUTION:** Concentrated **Pool Power Algacide** is extremely harmful to skin and eyes. Do not get in eyes. Avoid contact with skin. If contact occurs, flush with plenty of water for at least 15 minutes. If swallowed, do not induce vomiting. Get medical attention if food or drink is taken. Do not use in streams, ponds, or public water. Apply this product only as specified on this label.

**DOSAGE FOR NORMAL POOL** (free of visible algae). Maintenance dosage of 2 to 4 fl. oz. of **Pool Power Algacide** per 10,000 gal. of pool water every 5 to 7 days.

**JUST FILLED POOLS.** If the pool is clean and has been filled with clean water, give it an initial dose of 6 to 11 fl. oz. of **Pool Power Algacide** per 10,000 gal. of pool water.

**POOLS WITH VISIBLE ALGAE GROWTH.** Apply dose of 11 to 17 fl. oz. of **Pool Power Algacide** per 10,000 gal. of pool water. Remove settled algae debris by vacuuming.

**VERY DIRTY POOL WITH HEAVY ALGAE GROWTH.** Vacuum, clean and scrub walls. Then dose with 11 to 17 fl. oz. of **Pool Power Algacide**. Vacuum again to remove dead algae sediment.

**DO NOT MIX CONCENTRATED POOL POWER ALGACIDE** with any other concentrated chemicals . . . dry or liquid.

When properly diluted, **Pool Power Algacide** is compatible with those chemicals normally used to treat pools. **IT IS EFFECTIVE AT BOTH ACID AND ALKALINE PH.** It can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required.
