MSMA 6.6

MSMA Liquid

For Selective Post-Emergent Weed Control

ACTIVE INGREDIENTS:
 Monosodium Acid Methanearsonate* 51.0%
INERT INGREDIENTS: 49.0%
 Total Arsenic (as elemental all in water soluble form) 23.61%
 *Product contains 6.6 lbs. MSMA per gallon

KEEP OUT OF THE REACH OF CHILDREN

CAUTION:

Statement of Practical Treatment

- (1) If swallowed, drink one or two glasses of water. Induce vomiting by placing finger in back of throat. Call a physician. Never give anything by mouth to an unconscious person.
- (2) If in contact with eyes, or skin, flush with plenty of water.

See side panel for Additional Precautionary Statements.

EPA Reg. No. 19713-41

PRECAUTIONARY STATEMENTS

Hazards to humans and domestic animals

CAUTION: Harmful if swallowed. Avoid breathing spray. Do not get on clothing. Wash thoroughly with soap and water. Avoid contact with eyes. If contact occurs, flush with plenty of water. If swallowed, drink plenty of water. Do not induce vomiting unless directed to do so by a physician. Do not eat, drink, or smoke while using this product.

Environmental Hazards

Keep out of water. Do not discharge into water. Do not apply near water. Do not apply to aquatic life. Do not apply to birds.

DIRECTIONS FOR USE

Read and follow directions on this label and on the container of the product.

MSMA 6.6 Herbicide is useful for selective post-emergent control of weeds and grasses. It is most effective when applied to actively growing weeds. It is most effective when applied to weeds and grasses that are actively growing.

MIXING INSTRUCTIONS: Mix MSMA 6.6 Herbicide in water. Thoroughly clean the spray equipment before use. Add the required amount of herbicide and diluent to the spray tank. Fill the tank with water and apply. After use, clean equipment thoroughly by flushing with water. Do not store spray solution for a prolonged period.

COTTON: MSMA 6.6 Herbicide is useful as a directed application in cotton for the post-emergent control of weeds and grasses such as johnsongrass, nutgrass, dallisgrass, coarsetop, barnyardgrass, ragweed, sandbar, and pigweed. It should be applied at the rate of 2 1/2 pints per acre. Add 6 pints of MSMA 6.6 Herbicide and 1 to 2 quarts of a suitable surfactant to 100 gallons of water and mix thoroughly. Apply spray solution at 40 gallons per acre. Weed control is most effective at temperatures above 70°F. For best application in 40 inch rows, apply 1 gallon of spray solution per inch of row width per acre. Direct the spray solution to the base of the cotton plant. Nozzle should be placed so as to avoid spraying the cotton foliage. A second application may be required during humid growing conditions to control perennials, such as johnsongrass and nutgrass. Apply the second application 1 to 3 weeks later.

Slight burning and a reddish discoloration of the cotton leaf may occasionally occur following the recommended treatment, but the cotton plant will develop normally.

APPLY ONLY WHEN COTTON IS 3 INCHES HIGH TO FIRST FLOODE. DO NOT APPLY AFTER FIRST FLOODE. DO NOT FEED TREATED FORAGE TO LIVESTOCK OR GRAZE TREATED AREAS.

STORAGE AND DISPOSAL

Prohibitions: Do not mix with other chemicals. Do not use for purposes not intended by the manufacturer.

Pesticide Disposal: Do not use spray equipment to dispose of this product. Do not use for purposes not intended by the manufacturer. Do not use for purposes not intended by the manufacturer.

Container Disposal: Do not reuse empty container. Triple rinse or equivalent and render unusable. Dispose of in an incinerator or land fill approved for pesticide containers. Do not bury in a safe place.

Open dumping is prohibited.

Drexel warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
