SUCKER ATAK FOR CONTROL OF TOBACCO SUCKERS

STATEMENT OF PRACTICAL TREATMENT
IF SWALLOWED: Drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Get medical attention.
IF SPLASHED IN EYES: Flush with plenty of water for at least 15 minutes. Get medical attention.
IF SPILLED ON SKIN: Immediately remove contaminated clothing, INCLUDING SHOES, and wash skin with soap and plenty of water. If irritation develops, send for a physician.
NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER. CORROSIVE. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield. Wash thoroughly after handling. Harmful if swallowed. Do not breathe spray mist.

ENVIRONMENTAL HAZARDS

For terrestrial uses, do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

PHYSICAL OR CHEMICAL HAZARDS

Keep away from heat and open flame.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not apply this product through any type of irrigation system. Wear a long-sleeve shirt, long pants, and chemical resistant gloves at all times when mixing, loading, handling, or applying this chemical.

SUCKER ATAK is a contact and systemic sucker control agent which with one application kills small suckers on contact within one-half to one hour after application and then works systemically on the tobacco plant to control cell subdivisions and the formation of new suckers. **SUCKER ATAK** is formulated exclusively for the control of tobacco suckers.

SUCKER ATAK can be applied by conventional spray mechanisms. Use a semi-coarse spray and spray one or more rows at a time wetting only the upper 1/3 to 1/2 of the tobacco plant and allowing the liquid to run down the stalk of each plant, using only about 20 pounds of pressure. Plants that are leaning must be straightened so that the spray flows down the stalk evenly and contacts each sucker.

SUCKER ATAK should be applied during the early morning after the dew dries, all day on cloudy days, avoiding late afternoon or night applications. Spraying during the bright noon day sun at atmospheric temperatures above 90°F should be avoided since injury to the top tender leaves may result.
