Remove the statement - "Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application." from its current position within the Agricultural Use Box and place it above the Agricultural Use Box.

There is a typographical error(s) in the Spanish language

The apron requirement for "mixers and loaders" in the "Personal Protective Equipment" section on your proposed labeling is missing or incorrect. Remove the incorrect requirement (if any) and add "Chemical-resistant apron when mixing or loading" under "Mixers and loaders must wear:". The exact location is shown in Sections A and C on Part I of the Product Worksheet in Supplement Three-A to PR Notice 93-7.

GENERAL INFORMATION

SOY GRO is especially formulated for planter box treatment of soybean seed to control seed and soil-borne diseases, including damping-off, seed decay organisms and seedling blights and to provide essential MOLYBDENUM for plant growth where soils have been found to be deficient in available MOLYBDENUM. MOLYBDENUM helps the nodule bacteria and plants make more efficient use of nitrogen. It is prepared for use directly in the planter box, thereby eliminating seed handling to have seed treated.

A non-oil lubricant has also added to help prevent cracking and splitting of the seed so they will flow easily and evenly from the planter box.

This material provides adequate of seed and any excess flows with the seed into the furrow, giving additional protection against soil-borne diseases.

DO NOT USE TREATED SEED FOR FOOD, FEED OR OIL PURPOSES.

SPECIFIC DIRECTIONS

Use SOY GRO as a planter box treatment at the rate of 3 ounces per bushel of seed. Plant soybeans at the rate of at least one bushel per acre, or the amount of Molybdenum applied to each acre will not be adequate.

PLANTER BOX RATES ARE AS FOLLOWS:

Size of Planter Box	Number of 1-oz. Scoops per Planter Box
1/2 bushel	2 Heaping Scoops
1 bushel	4 Heaping Scoops
