This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval (REI). The requirements in this box only apply to uses of this product that are covered by the WPS. Do not enter or allow worker entry into treated areas during the REI of 12 hours.

PPE required for early entry to treated areas that is permitted under the WPS and that involves contact with anything that has been treated, such as plants, soil, or water is: coveralls, chemical-resistant gloves made of any waterproof material, and chemical-resistant footwear plus socks.

### NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Keep children and pets out of the treated area until sprays have dried.

### MIXING INSTRUCTIONS

This product must be thoroughly mixed. Fill the spray equipment reservoir about half full with water and add the required amount of herbicide with agitation. Finish filling the reservoir with water, agitate, then apply. After use, clean equipment thoroughly by flushing with water. Do not store spray solution in tank for a prolonged period.

### COTTON

This product is useful for control of emerged weeds and grasses such as those listed under GENERAL INFORMATION and many similar weeds in Cotton. The addition of surfactant to this product is not necessary.

**POSTEMERGENT-DIRECTED:** Mix this product at a rate of one-third gallon in 40 gallons of water for application as a directed broadcast spray to 1 acre when weeds are small. For band applications in 40 inch rows, apply 1 gallon of spray solution per inch of band width per acre. A second application may be required during humid growing conditions to control perennials, such as Johnsongrass and Nutsedge. Apply the second application 1 to 3 weeks later. Keep spray off Cotton foliage. Apply only when Cotton is 3 inches high to first bloom. Do not apply after first bloom. Nozzles should be adjusted to direct spray to weeds to allow maximum coverage of weeds with no contact to Cotton foliage.

For Postemergent-Directed Banded Applications:

Band Size	Amount of This Product Per Acre	Gallons of Water Per Acre
12 inches	13 fl. ozs.	12
14 inches	15 fl. ozs.	14

Off-center fan type nozzles, 100 mesh screen, approximately 5 inches from the ground with 25 pound pressure may be used. Do not apply after first bloom.

Slight burning and a reddish discoloration of the Cotton leaf may occasionally occur following the recommended treatment, but the Cotton plant will fully recover.

Do not apply when conditions favor drift from areas being treated as injury to non-target areas or adjacent crops may result. Do not feed treated foliage to livestock or graze treated areas.

### LAWN AND ORNAMENTAL TURFGRASS

This product is useful for control of emerged weeds and grasses such as those listed under GENERAL INFORMATION and many similar weeds with little or no injury to good grass lawns. On new lawns, do not treat until after three mowings. Good grasses may be temporarily discolored. Bermuda, Bluegrass, and Zoysia are quite tolerant. Injury may result if applied to Bentgrasses and Fescue. Do not apply to St. Augustine, Carpetgrass, Centipedegrass, or to Dichondra.

Mow turfgrass 1 to 1.5 inches high before treatment. Mix 1.33 fluid ounces (8 teaspoons) of this product in 2.5 gallons of water and apply to 1,000 square feet area. Spray thoroughly to wet all undesirable plants. Repeat applications, 10 to 14 days apart, may be needed for good control. Applications should be made during warm weather (between 80° to 90°F). Do not water turf for at least 24 hours after applications. Do not apply with hose-end applicators. Do not reseed until two weeks after last application.

### NON-CROP USE

This product is useful for control of emerged weeds and grasses such as those listed under GENERAL INFORMATION and many similar weeds on drainage ditchbanks, fence rows, right-of-ways, storage yards and similar non-crop areas. Applications should be made when weeds are small and conditions are favorable for good weed growth. Mix this product at a rate of 6 to 12 pints in 100 gallons of water. Spray unwanted vegetation thoroughly at a rate of about 50 gallons of spray solution per acre. Use spray equipment that gives good low volume coverage. If regrowth occurs, reapply as required. Do not feed treated foliage to livestock nor graze treated areas.
