Subject: Amendment to Add a Supplemental Label – Post-emergence Use in Soybeans
Product Name: Drexel Me-Too Lachlor Herbicide
EPA Registration Number: 19713-548
Application Date: 03/09/2016
Decision Number: 515640

Dear Ms. Chan:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval is only for a supplemental label that is an addendum to the master label. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

This supplemental labeling contains some new and/or revised uses and/or directions which may be additional to the uses and/or directions found on the label on or attached to the container, but this supplemental labeling does not by itself constitute the complete set of use directions. The complete set of use directions is set forth on the container label as combined with this supplemental labeling.

A stamped copy of your labeling is enclosed for your records. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6.

If you have any questions, please contact Terri Stowe at (703) 305-6117 or by email at stowe.terri@epa.gov.

Sincerely,

A handwritten signature in black ink that reads "Kathryn V. Montague".

SUPPLEMENTAL LABEL

ACCEPTED

04/19/2016

Under the Federal Insecticide, Fungicide
and Rodenticide Act as amended, for the
pesticide registered under
EPA Reg. No. 19713-548

Drexel

*Me-Too-Lachlor*TM

Herbicide

(EPA Reg. No. 19713-548)

FOR POST-EMERGENCE USE ON SOYBEANS*

THIS SUPPLEMENTAL LABEL EXPIRES ON JULY 5, 2017 AND MUST NOT BE USED OR DISTRIBUTED AFTER THIS DATE.

KEEP OUT OF REACH OF CHILDREN CAUTION

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the entire Drexel Me-Too-Lachlor Herbicide label before proceeding with the use directions contained in this supplemental labeling.
- Follow all applicable directions, restrictions, Worker Protection Standard (WPS) requirements, and precautions on the registered label for EPA Reg. No. 19713-548.

POST-EMERGENCE APPLICATIONS

Post-emergence (From emergence up through the 3rd trifoliolate leaf stage)

Apply 1.0 to 1.33 pints per acre as a post-emergence treatment to Soybeans from emergence up through the 3rd trifoliolate leaf stage. This product will not control emerged weeds so it must be applied to a weed-free surface or in tank mixture with products that provide post-emergence control of weeds present at the time of application.

Post-emergence (From emergence up through the 5th trifoliolate leaf stage)

Apply 1.0 to 1.33 pints per acre as a post-emergence treatment to Soybeans from emergence up through the 5th trifoliolate leaf stage. This product will not control emerged weeds so it must be applied to a weed-free surface or in tank mixture with products that provide post-emergence control of weeds present at the time of application.

Note: Make post-emergence applications at least 90 days before harvest.

USE RESTRICTIONS

To avoid possible illegal residues when this product is applied post-emergence to Soybeans, (1) Do not apply more than 1.33 pints per acre post-emergence; (2) Do not graze or feed treated forage or hay from Soybeans to livestock following a post-emergence application of this product; (3) Do not apply a post-emergence application of this product if a pre-plant surface, pre-plant incorporated or pre-emergence application of products containing Metolachlor has already been applied.

POST-EMERGENCE APPLICATIONS

Tank Mixture with Glyphosate Products

This product at 1.0 to 1.33 pints per acre may be tank mixed with Glyphosate products at labeled rates and applied from emergence up through the (3rd) (5th) trifoliolate leaf stage of Roundup Ready or glyphosate-tolerant soybeans. This product alone will not control emerged weeds. Use this treatment only on Soybeans designated for use with glyphosate (e.g., Roundup Ready or glyphosate-tolerant Soybeans). The glyphosate product must be registered for post-emergence use in Roundup Ready or glyphosate-tolerant soybeans.

Tank Mixture with Glufosinate Ammonium (Liberty®) Products

This product at 1.0 to 1.33 pints per acre may be tank mixed with Glufosinate products at labeled rates and applied from emergence up through the (3rd) (5th) trifoliolate leaf stage of Soybeans. This product alone will not control emerged weeds. Use this treatment only on Soybeans designated for use with Glufosinate (e.g., Liberty Link).

Use Precaution: The use of adjuvants such as COC or UAN with this product may result in temporary crop injury.

Use Restrictions: To avoid possible illegal residues when this product is applied post-emergence to Soybeans, (1) Do not apply more than 1.33 pints per acre post-emergence; (2) Do not graze or feed treated forage or hay from Soybeans to livestock following a post-emergence application of this product.

Note: (1) Follow the tank mix product label for adjuvant directions. (2) Make post-emergence application at least 90 days before harvest.

It is the pesticide user's responsibility to ensure that all products in the listed mixtures are registered for the intended use. Users must follow the most restrictive directions for use and precautionary statements of each product in the tank mixture.

*Not for use in California.
