

AS-406 SP

ACC 10

14 SEP 1976
19761-4

ACTIVE INGREDIENT

Polyoxyethylene (dimethylamino) ethylene
(dimethylamino) ethylene dichloride) 10.0%

INERT INGREDIENT

90.0%

This product contains 0.85 lb. of active ingredient per gallon and weighs 8.49 lb per gallon.

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.

FIRST AID: If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. Permits may be required for discharges containing this pesticide into lakes, streams, ponds, or public water. For guidance, contact the regional office of the Environmental Protection Agency.

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

Use only as directed on the label. Do not use in a manner inconsistent with the label.

AS 406 SP is used to control the growth of algae in swimming pools, spas, hot tubs, and hot tubs. For maximum effectiveness, pools, spas, hot tubs, and hot tubs containing heavy growth of algae should be cleaned prior to using AS 406 SP.

For pools having just visible algae growth add an initial dose of 75 to 116 fluid ounces of AS 406 SP per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool add initially 41 to 75 fluid ounces of AS 406 SP per 10,000 gallons of water. Subsequent additions of 13.6 to 27 fluid ounces of AS 406 SP per 10,000 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

Spas, whirlpools, or hot tubs having just visible algae growth require an initial dose of 8 to 12 fluid ounces of AS 406 SP per 1,000 gallons of water. For treatment of a freshly cleaned and filled spa, whirlpool, or hot tub, add initially 4 to 8 fluid ounces of AS 406 SP per 1,000 gallons of water. Subsequent additions of 1 to 3 fluid ounces of AS 406 SP should be made every 5 to 7 days after initial treatment for maintenance.

AS 406 SP is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. AS 406 SP can be used in pools and spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix AS 406 SP with concentrated dry or liquid chlorine products.

STORAGE & DISPOSAL: Keep container closed when not in use. Do not contaminate water, food, or feed by storage, disposal or cleaning of equipment. Rinse that cannot be used or reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies. Open dumping is prohibited.

METAL CONTAINERS: Triple rinse and offer for recycling, reconditioning, or disposal in an approved landfill or bury in a safe place.

PLASTIC CONTAINERS: Do not reuse empty container. Triple rinse and incinerate or dispose of in an approved landfill or bury in safe place.
