

GENERAL INFORMATION

MOBLEY "F-5" LIQUID WEED KILLER is a finished herbicide formulation which requires no further dilution for application to non-cropland areas.

DIRECTIONS

WEED CONTROL ON RAILROAD RIGHT-OF-WAYS AND ON INDUSTRIAL AREAS

PUNCTURE VINE: In moderate rainfall areas (20 to 30 inches per year), treat during late winter to early spring before puncture vine emerges.

In low rainfall areas (4 inches or less per year), treat during fall or early winter, just before rains cause puncture vine to sprout.

RUSSIAN THISTLE; other seedling weeds such as plantain, kochia, turkey mullein, pigweed, and lambsquarter.

In areas with seasonal rainfall, treat in late fall or early winter, just before rains cause weeds to germinate.

In other areas, treat in the spring before weeds germinate. Apply 90 to 120 gallons of MOBLEY "F-5" LIQUID WEED KILLER per acre. Use the higher rate for longer residual control, or where rain is distributed throughout the year.

FIELD BINDWEED, leafy spurge; Russian knapweed, Canada thistle:

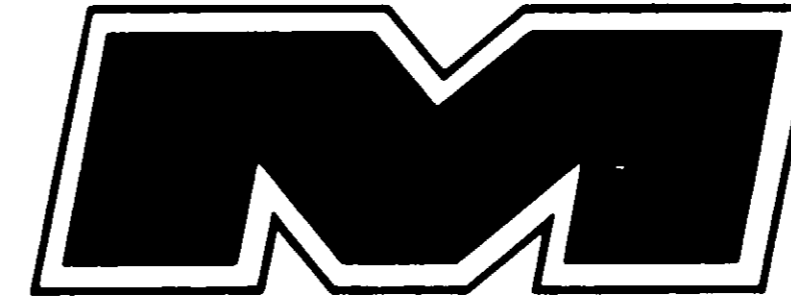

In moderate rainfall areas, apply MOBLEY "F-5" LIQUID WEED KILLER any time during the growing season. Rainfall after application is important for leaching the chemical into the root zone of perennial weeds. Therefore, treat prior to any rainy season, usually early spring or fall. Treat an extra 10 feet around patches of deep-rooted perennial weeds to make sure all roots are affected.

AMOUNTS TO USE

AREA SPRAYED	MOBLEY "F-5" LIQUID WEED KILLER
Large treatments	1 acre 360 gallons

Thoroughly wet weed foliage and soil around weeds. If top growth of weeds is so heavy that MOBLEY "F-5" LIQUID WEED KILLER will not reach the soil, burning or mowing top growth before treatment is suggested. Where practical, discing the material into the soil after application improves weed control.

Comment

ANNUAL GRASSES, annual and some perennial broadleaf weeds.

Apply 300 gallons of MOBLEY "F-5" LIQUID WEED KILLER per acre. For seasonal control of annual weeds, treat in early spring before weed growth begins. Do not apply to frozen ground. For perennial broadleaf weeds, apply in spring or fall when rainfall after application will help leach the chemical into the root zone of these weeds.

ANNUALS: foxtail, crabgrass, barnyard grass, smartweed, lambsquarter, pigweed, ragweed.

PERENNIALS: bur ragweed, indian rush pea, Texas blueweed, mouse-ear poverty weed, alkali, sida, chickweed, plantain, dandelion, bouncing bet.

IMPORTANT: Do not apply MOBLEY "F-5" LIQUID WEED KILLER to frozen soil or soil subject to the rapid washing that follows a winter thaw or heavy rain. MOBLEY "F-5" LIQUID WEED KILLER will not work properly when applied to moving water in draining streams, or to bottom mud saturated with seepage water.

CAUTION:

Harmful if swallowed. Avoid contact with skin, eyes or clothing. Do not take internally.

Do not use the same sprayer for other purposes. Do not store near fertilizers, seeds, insecticides or fungicides, or use in a greenhouse.

Do not contaminate water used for irrigation or domestic purposes.

Avoid spray drift. Tests have shown that very small amounts of this material can injure many broadleaf plants such as tobacco, soybeans, cotton, most vegetables, and ornamentals.

Do not contaminate water used for irrigation or domestic purposes. Consult your State Fish and Game Agency before applying this product.

WARRANTY:

Seller warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on such label only when used in accordance with directions under normal use conditions. This warranty does not extend to use of this product contrary to label use direction, or under abnormal use conditions not reasonably foreseeable to seller; buyer assumes all risk of any such use. Seller makes no other warranties, express or implied.
