

DIRECTIONS

To Kill Cockroaches and Waterbugs:

Put a small amount of Roach Bait under the sink, refrigerator, hot water heater and similar places. Put bait in as many different places as possible for best results. Roaches like places that are warm, wet and dark. They crawl along water pipes and through small cracks. They sleep during the daytime and look for food at night.

The adult roaches will be killed in two to three weeks. For up to 90 days, tiny roaches will hatch from eggs, and these will also be killed by the bait. Leave the bait in place. It will not lose strength. If not pleased, purchase price will be refunded.

WALSH'S ROACH BAIT

CAUTION

Keep Out Of Reach Of Children

ACTIVE INGREDIENT:

BORIC ACID 50.00%

← INERT INGREDIENT: 50.00%
