FORMULATING INSTRUCTIONS:

1. ALTOSID CP-10 is a light, fluffy product and therefore, whenever possible, the material should be added directly to the mixer. Elevators, long free-fall gravity chutes, etc. should be avoided.
2. It is critical in order to avoid loss of the low density premix that additions be made under conditions of low air turbulence or flow (shut-off exhaust systems during ALTOSID CP-10 addition).
3. Whenever possible, add the ALTOSID CP-10 after the addition of the liquid components and blend to homogeneity.
