ZOECON[®]

KABAT[®] Tobacco Protector

Introduction.

Exposure of the larval instars of the cigarette beetle (*Lasioderma serricorne*) and tobacco moth (*Ephesia elutella*) to KABAT[®] Tobacco Protector prevents adult emergence. KABAT contains an Insect Growth Regulator which has no effect on pupae or adult insects. When applied as directed, KABAT Tobacco Protector has sufficient field life under varying tobacco storage conditions to prevent insect population increase.

Mixing Instructions.

To treat 1,000 pounds of tobacco, add 0.2 pounds of KABAT Tobacco Protector to 2.5 pounds of SDA-4 alcohol and agitate. With agitation, add 7.3 pounds of water for a total of 10 pounds of spray solution. Agitate until homogeneous. The dilute mixture of KABAT spray should be used within 24 hours.

Method Of Application.

Treat tobacco by spraying KABAT Tobacco Protector at a weight ratio of 10 pounds of dilute spray to 1,000 pounds of tobacco at the stage of moisture content adjustment immediately prior to compaction for storage in hogsheads. Assure complete coverage by using multidirectional sprayers or tumbling.

Warranty And Conditions Of Sale.

Zoecon Corporation warrants that the chemical composition of this product conforms to the chemical description on the label. Zoecon makes no other warranty, express or implied, concerning the use of this product other than as indicated on the label.
