

MUNEX™ 5E controls leafminer populations in many situations by preventing adult emergence from pupae in treated soil. **MUNEX™ 5E** does not kill adult flies present at the time of treatment. To prevent reinfestation from untreated areas, application should be uniform throughout the entire greenhouse where plants are growing. If a heavy population of leafminer adults (flies) is present, use of an appropriate adulticide may be required initially.

Avoid contact with eyes. In case of contact, immediately flush eyes with plenty of water. Get medical attention if irritation persists.

Store in cool place. Do not contaminate water, food or feed by storage or disposal. Open dumping prohibited. Triple rinse and offer for recycling, reconditioning, or disposal in approved landfill or bury in safe place.

Consult Federal, State or Local disposal authority approved alternative procedures

MINEX 
INSECT GROWTH REGULATOR
