DIRECTIONS FOR USE

It is a violation for Federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR POOL USE: To establish chlorine residual: Add ½ gallon for each 10,000 gallons of water. Repeat dosage until a chlorine residual of 0.6 to 1.0 ppm is obtained. The pool water should be maintained at pH 7.2 to 7.6 as determined by a test kit.

Daily Chlorination: Add 11 oz. for each 10,000 gallons of pool water daily or as needed to maintain 0.6 to 1.0 ppm chlorine residual at all times in unstabilized pools. In pools that have been stabilized with cyanuric acid, a chlorine residual of 1.0 to 1.5 ppm should be maintained at all times.

The quantity of daily addition will vary with temperature, sunlight, bathing load and other factors. Test pool water frequently with a chlorine test kit to maintain the desired chlorine residual. Bathing should not be allowed in the pool when the residual chlorine is above 3 ppm.

Super Chlorination Purposes: For effective algae control, a regular program of superchlorinating at least once a week, preferably at night while pool is not in use should be maintained.

Directions: Add 1 gallon for each 20,000 gallons of pool water directly to the pool water.

NOTE: This product degrades with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.
