NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.

2. Make the labeling changes listed below before you release the product for shipment:

a. Add the phrase "EPA Registration No. 21268-16."

b. In the Directions for Use, add a statement that the chlorine residual (or the frequency of treatment, or the necessary dosage) is dependent on temperature and number of swimmers.

c. In the Directions for Use, in step 3 ("Superchlorinate...using one of Blue Shield's chlorinating products"), add an instruction to follow the label directions for that product.

d. Add a statement that the re-entry into treated swimming pools is prohibited above levels of 3 (or 2) ppm chlorine residual. (This is in accordance with the May 7, 1993 Reregistration Eligibility Document for chlorinated isocyanurates).

3. Submit a certification of child-resistant packaging, following the instructions given in the enclosed Federal Register excerpt: see §157.34(b).

4. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Submit a letter for our records, on the applicant's company letterhead or notarized, authorizing you to act as their agent in registration matters for this (or every) product.

A stamped copy of the label is enclosed for your records.

Sincerely,

Ruth G. Douglas

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Check the pH of the pool water with a test kit and adjust as necessary with pH increase or pH decrease to maintain a pH range of 7.2 to 7.6.
2. Add Blue Shield's Stabilizer and Conditioner if the pool water has not been stabilized previously.
3. Superchlorinate newly filled pool or a pool with no chlorine residual using one of Blue Shield's chlorinating products.
4. Punch out the holes marked "1" and "2" on the sides of this cartridge. Then punch out additional holes until a satisfactory chlorine residual is reached. As more holes are punched, the chlorine residual will rise.
5. It is recommended that the pH and chlorine levels be checked daily with a test kit to maintain a pH level of 7.2 to 7.6 and a chlorine residual of 1.0 to 1.5 ppm (parts per million).
6. When the cartridge is empty, replace it immediately.

The Blue Shield E-Z Cartridge is designed to be used in automatic chlorinators, floating dispensers and other types of flow thru proportioning devices. In certain pools, the cartridge may be placed in the skimmer cover. Follow the equipment manufacturer's directions to insure a constant chlorine residual of 1.0 to 1.5 ppm. **IMPORTANT:** Do not remove tablets from cartridge or refill when empty. If the cartridge is placed in the skimmer, do not add other chemicals to the skimmer. Do not mix this product with other chemicals.
