

23335-1

**ACCEPTED**

*July 22, 1974*

UNDER THE FEDERAL INSECTICIDE  
FUNGICIDE AND FUNGICIDE ACT  
FOR CONTROL OF FUNGICIDE  
REGISTERED UNDER PROJECT  
23335-1 SUBJECT  
FO ATTACHED COMMENTS.

**APPLICATION**

WATER-CON is used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers. Prior to its use, systems must be cleaned to remove algae growth, microbiological slime and other deposits. An initial slug addition of 6.13 to 15.32 fluid ounces of WATER-CON per 1000 gallons of water to provide a concentration of 48 to 120 parts per million of WATER-CON based on the total weight of water in the system is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 1.53 to 15.32 fluid ounces of WATER-CON per 1000 gallons of water (12 to 120 parts per million of WATER-CON) should be employed every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

EPA Reg. No. 23335-1

**CAUTION**

**KEEP OUT OF THE REACH OF CHILDREN**

Harmful if swallowed. Avoid contact with skin and eyes. In case of contact flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment or disposal of waste. Use only as directed on label. Do not reuse container. Destroy when empty.
