

DIRECTIONS FOR USE

This top quality insecticide-repellent formulation should be diluted in water. When applied to dogs and cats as directed, it will kill fleas, ticks, mosquitoes, gnats and flies. This product will repel mosquitoes, gnats and flies.

Dilution: Mix 1 part insecticide with 13 parts water for use as a wash or spray. Stir before using.

To control Lice, Fleas and Ticks: Apply to wet the fur, either as a wash or wet spray. When spraying, stroke against the lay of the hair and direct spray into parted fur to insure penetration. Spray directly on ticks. Sleeping quarters and bedding should also be treated to prevent reinfestation. Repeat treatment as necessary.

For temporary protection from flies, mosquitoes and gnats, apply above dilution as a light mist to the surface of the fly. Reapplication needed.

CAUTION: Do not allow children to inhale or ingest.

This product is toxic to fish. Keep out of lakes, ponds, streams, etc. Do not contact water. Wash by hand after use. Do not use on birds, dogs or cats.

For more information, contact the manufacturer.

WASH INSECTICIDE FOR DOGS & CATS

Kills and Repels Mosquitoes, Gnats and Flies

Kills Fleas and Ticks

Emulsifiable Concentrate

Active Ingredients	
Pyrethrins	0.53%
