

[23561-2]

### DIRECTIONS FOR USE

This high quality insecticide-repellent combination is designed for use on dogs and cats.

Hold container upright, with actuator directed toward the animal at a distance of 10 to 12 inches.

To control Flea and Lice: Beginning at the tail, spray the entire animal until the hair is damp up to the back of the neck. On long-haired animals, ruffle the coat and spray against the lay of the hair, directing spray into parted hair so that the skin is contacted. Avoid spraying face and scrotum. Do not treat or cause exposure of puppies or kittens less than 4 weeks of age. To reduce chance for reinfestation, remove and spray or replace bedding and spray sleeping quarters thoroughly. Repeat treatment when reinfestation occurs.

For best results in controlling Tick infestations, locate ticks and spray directly on them.

For temporary protection from the annoyance of Flies, Mosquitoes, and Gnats, spray the surface of the animal's coat. Repeat treatment once or twice daily when insects are troublesome.

**CAUTION:** Avoid breathing of spray mist. Avoid contact with skin; wash thoroughly after use. Avoid contamination of feed or foodstuffs.

Wash hands after using.

**WARNING:** Contents under pressure. Do not puncture. Do not expose container to temperatures above 130°F. Never throw container into fire or incinerator.

# FLEA & TICK SPRAY

**Kills and Repels Mosquitoes, Gnats and Flies**

**Kills Fleas and Ticks**

**Leaves a Pleasant Odor**

Active Ingredients	
Pyrethrins	0.053%
* Piperonyl Butoxide, Technical	0.531%
