

1934-1-10

For most effective results against the active stages of flying insects use a good sprayer adjusted to deliver a fine mist. For running and crawling insects use a coarse wet spray.

Treat infested areas thoroughly and whenever possible, keep doors and windows closed for 10 minutes after spraying.

**Flying Insects:** For control of flies, fruit flies, mosquitoes, gnats, sand flies, direct the spray toward the upper portions of the room and saturate the atmosphere with the mist, using 1 to 2 ounces to each 1000 cubic feet of space.

**Crawling Insects:** To control roaches, silverfish, crickets, and spiders, spray infested areas thoroughly and direct the liquid behind baseboards, moldings, cabinets, shelves, sinks, door and window frames, and pipes, toward drains and dark corners, and into cracks, crevices, recesses and similar hiding places hitting insects with spray whenever possible.

Against ant infestations, treat shelves, cabinets and storage areas; spray ant runs, trails, baseboards, thresholds and other places of entry, and treat nests liberally.

In controlling fleas and Brown Dog ticks in houses, direct the application toward the lower wall portions, baseboards, rugs, carpets and floors of infested areas. Animal quarters, kennels and bedding should also be sprayed.

To control bedbugs effectively, apply liberally to top, ends, sides and bottom of mattresses, spraying thoroughly all tufts, seams and folds. Spray springs and frame, directing the liquid into all cracks and lock joints. Treat walls, baseboards, moldings, floors, closets and bedroom furniture, picture frames, with particular attention to protected bedbug hiding and breeding places.

**ACTIVE INGREDIENTS:**

- Pyrethrins ..... 0.1%
- Piperonyl Butoxide, Technical\* ..... 0.8%
- Petroleum Distillate ..... 99.1%

\*Equivalent to 0.14% of (butylcarbityl) (6-propylpiperonyl) ether and to 0.16% of related compounds.

## CAUTION

**Keep Out Of Reach Of Children**

Harmful if swallowed. Do not spray near or toward an open flame. Avoid contamination of feed and foodstuffs.

Do not remain in treated areas and ventilate the area after treatment is completed. The use of this product in food processing plants should be confined to time periods when the plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using.

DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME. DO NOT REUSE EMPTY CONTAINER. DESTROY IT BY PERFORATING OR CRUSHING. BURY OR DISCARD IN A SAFE PLACE AWAY FROM WATER SOURCES.

Camera man's Note  
Poor Copy

For most effective control of clothes moths and carpet beetles, remove infested articles from storage, brush thoroughly and, if possible, air several hours in direct sunlight. Apply spray liberally in empty closets, bureaus and storages, directing the liquid into cracks, joints and crevices. After airing, infested articles may be treated by holding the spray nozzle at least 3 feet away from the fabric and applying the liquid lightly to the seams to avoid the possibility of staining. Treat both sides of rugs, carpets and pads, and all exposed and accessible surfaces of overstuffed furniture. Do not overspray if products are made of rubber or are rubber coated, to prevent expansion and swelling. Repeat treatments monthly unless the articles are stored in moth-tight containers.

Home and institutional pantries and food storages frequently become infested with granary weevils, rice weevils, confused flour beetles, rust red flour beetles, sawtoothed grain beetles, sugarcane grain moths and Mediterranean flower moths. Avoid sources of reinfestation, wormy flour and cereals should be destroyed before treatment. To kill exposed accessible stages of insects named

Spray thoroughly all surfaces: shelves, bins, cupboards, cabinets, pantry lockers and similar storages, with particular attention to cracks, niches, crevices and other hiding places hitting insects with spray whenever possible.

**ACTI-CIDE** is an excellent insecticide for use as a vapor, fog or spray in special generators.

Application should be sufficient to fill the enclosure with fog, mist or vapor.
