ACTIVE INGREDIENTS .....	100.00%
Pyrethrins .....	0.15%
Technical Piperonyl Butoxide* .....	0.30%
N-octyl Bicycloheptene Dicarboximide .....	0.50%
Petroleum Oil .....	99.05%
*Consists of 0.24% (butylcarbityl) (6-propylpiperonyl) ether and 0.06% related compounds.	

*Handwritten note:* 9/11/68  
29/1968  
REPEL

### DIRECTIONS FOR USE

**For Inside Use:** Cover exposed foods and utensils and close doors and windows. Remove pets, bird cages and fish bowls from room during spraying. Use a good sprayer and direct the spray upward so that the spray particles will fill the air, using 3 to 4 ounces per 1000 cubic feet of space. Allow the room to remain closed at least for 15 minutes for the very best results.  
For crawling insects, such as roaches and ants, apply to point of run-off on baseboards, all cracks and crevices in woodwork, underneath sinks, dark places behind pipes,

and in places where the insects rest and travel. Repeat the operation as often as necessary.

**For Outside Use:** For flying insects indicated above direct the spray upward to envelop insects while they are in the air or apply to hit the insects that may be resting on furniture, shrubs, or the ground. For crawling insects apply the spray directly to ant hills, nests and trails. Spray door sills and window wells and other areas where ants and roaches enter the building.

### CAUTION: KEEP OUT OF REACH OF CHILDREN.

Harmful if swallowed. Use in food processing plants only when plant is not in operation. All food processing surfaces should be covered or thoroughly cleaned before using. Food should be removed or protected during treatment. Do not use or store near heat or open flame. Keep container tightly closed.

Contents: 5 gallons
