

SPRA-GON

Drosophila Spray

Especially formulated for the control of drosophila, fruit flies, mosquitoes, flying moths, biting midges, flies, roaches, ants, and wasps in food processing plants such as wineries, canneries, frozen food plants, dehydrators, meat packing and processing plants, and such establishments as bakeries, meat markets, restaurants and kitchens.

ACTIVE INGREDIENTS	100.00 %
Pyrethrins	0.25 %
Technical Piperonyl Butoxide*	2.00 %
Petroleum Oil	97.75 %
*Consists of 1.60% (butylcarbityl) (6-propylpiperonyl) ether and 0.40% other related compounds.	

DIRECTIONS FOR USE

For Inside Use: For flying insects, such as drosophila, fruit flies, mosquitoes, gnats, biting midges, flying moths, and wasps: cover exposed foods, utensils and other equipment and close doors and windows. Use a good sprayer and direct the spray upward so that the spray particles will fill the air, using 2 or 3 ounces per 1000 cubic feet of space. Allow the room to remain closed at least 15 minutes for the very best results.

For crawling insects, such as roaches and ants, apply to point of run-off on baseboards, in all cracks and crevices, underneath sinks,

in dark places behind pipes and in places where these insects rest and travel.

For Outside Use: For flying insects indicated above direct the spray upward to envelop insects while they are in the air, or apply the spray to areas where the insects may be resting.

For crawling insects apply the spray directly to ant hills, nests and trails. Spray door sill and window wells and other areas where ants and roaches enter the building. Repeat as necessary.

CAUTION: KEEP OUT OF REACH OF CHILDREN.

Harmful if swallowed. Use in food processing plants only when plant is not in operation. All food processing surfaces should be covered or thoroughly cleaned before using. Food should be removed or protected during treatment. Remove pets, bird cages, and fish bowls from rooms being sprayed. Do not use or store near heat or open flame. Keep container tightly closed.

Contents: 5 gallons
