

POOL WATER

INITIAL DOSAGE:

1 oz. per 1,000 gallons of pool water for 1 ppm available chlorine.

It is commonly recognized that the germicidal activity of available chlorine decreases as the Ph of water is increased from 5.0 to 9.0. A Ph range of 7.2 to 7.6 in pool water should be maintained. Use a test Kit for Ph control.

SUBSEQUENT DOSAGE:

Maintain chlorine at 0.6 to 1.0 ppm as determined by suitable chlorine test kit. Test frequently and for each 0.1 ppm chlorine that should be added use 1 ounce liquid chlorine per 10,000 gallons of pool water.

CONTENTS: 5 GALLONS

EPA Reg No 25198-2

MORSE'S GENERAL SANITIZER

NO. 101

Active Ingredient:

Sodium Hypochlorite 12½%

Inert Ingredient 87½%

100%

The active ingredient in this material is chemically unstable, as it must be to perform effectively as a sanitizer. It will tend to decompose with time especially at elevated temperatures.

WARNING

**KEEP OUT OF REACH
OF CHILDREN**

Harmful If Swallowed

See First Aid Statement and Other Precautions on Side Panel.

F. J. MORSE CO., INC.

541 No. Wheeler / St. Paul, Minn. 55104

WARNING

Do not get in eyes, on skin or on clothing. Avoid prolonged breathing of spray mist.

Antidote: External

Wash with water.

Antidote: Internal

Drink Mucilage, Raw Egg White, Milk or Rice Gruel.

CALL A DOCTOR

Rinse empty container with water and discard it.

BATH HOUSE MAINTENANCE

Spray or swab area to be treated with solution containing 5 oz. **Morse's Sanitizer** in 1 gal. water. This concentration is suitable for scrubbing shower room floors, locker room benches, bath mats and other surfaces commonly contacted by the bare feet to aid in preventing spread of athlete's foot fungi.
