NET CONTENTS 1 QT. (U.S.) 32 OZ • .946 LITBES

ALGI-KILL is used to control the growth of green and/or black algae in swimming pools. For maximum effectiveness pools containing heavy growth of algae should be cleaned prior to using ALGI-KILL.

- 1. FOR TREATMENT OF A FRESHLY CLEANED POOL, add initially 13 to 24 fl. oz. of ALGI-KHL per 10,000 gal. of water.
- 2. TO MAINTAIN POOLS FREE OF VISIBLE ALGAE GROWTH sub sequent additions of 4 to 8 fl. oz. of ALGI-KILL per 10,000 gal, of water should be made every 5 to 7 days after initial treatment
- 3. FOR POOLS HAVING VISIBLE ALGAE GROW'I'H add an initial dose of 24 to 37 fl. oz. of ALGI-KILL per 10,000 gal of water and remove settled algae debris by vacuuming. NOT NECESSARY TO SUPERCHLORINATE.

Method of Application

Mix the required amount with water in a bucket and distribute eventy throughout the pool or add directly to skimmers.

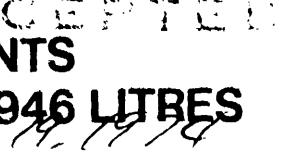

ALGI-KILL is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH ALGI-KILL can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. ALGI-KILL helps clarify water and does not cause temporary discoloration when used properly,

CAUTION: Rinse empty container thoroughly with water and discard container. This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams ponds, or public 1/// water. Apply this product only as specified on this laber
