

ALGAECIDE No. 15

Use Directions

BONCO ALGAECIDE-SLIMICIDE No. 15 is used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers. Prior to its use, systems must be cleaned to remove algal growth, microbiological slime and other deposits. An initial slug addition of 4.0 to 10.0 fluid ounces of BONCO ALGAECIDE-SLIMICIDE No. 15 per 1000 gallons of water to provide a concentration of 32 to 80 parts per million of BONCO ALGAECIDE-SLIMICIDE No. 15 based on the total weight of water in the system is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 1.0 to 10.0 fluid ounces of BONCO ALGAECIDE-SLIMICIDE No. 15 per 1000 gallons of water (8 to 80 parts per million of BONCO ALGAECIDE-SLIMICIDE No. 15) should be employed every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

[Faint illegible text]

BONCO

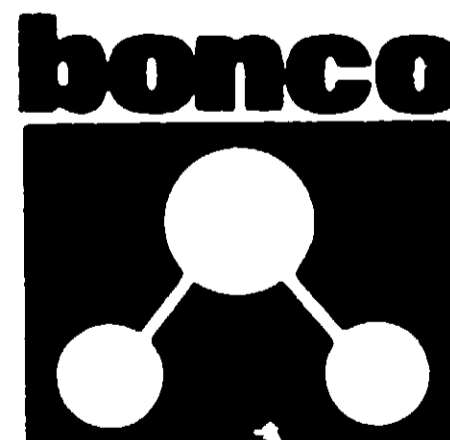

ALGAECIDE-SLIMICIDE

NO. 15

ACTIVE INGREDIENT 15.0%
 Poly[oxyethylene(dimethyliminio)ethylene
 (dimethyliminio)ethylene dichloride] 15.0%
 INERT INGREDIENT 85.0%

Weight per gallon 8.58 pounds
 Weight of active ingredient
 per gallon 1.29 pound

CAUTION:
KEEP OUT OF THE REACH OF CHILDREN
 See Right Panel for Additional Caution Statements.

Manufactured by
 BONCO MANUFACTURING CORPORATION

CONTENTS: GALLONS

ALGAECIDE No. 15

CAUTION: Harmful if swallowed. In contact with skin and eyes. In case of contact flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food.

This product is toxic to fish. This effluent should not be discharged which will drain into lakes, streams, ponds or public water. Do not contaminate equipment by cleaning of equipment or disposal of waste. Use only as directed on label and do not reuse container. Destroy when empty.

ALGAE SLIMICIDE No. 15

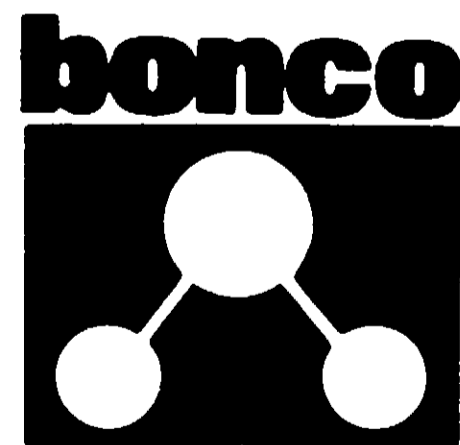

Directions

ALGAE SLIMICIDE No. 15 is used to control algae, bacteria, and fungi in commercial and industrial cooling towers. Prior to its use, towers should be cleaned to remove algal slimes and other biological slimes. An initial slug addition of 4.0 to 8.0 ounces of BONCO ALGAE SLIMICIDE No. 15 per 1000 gallons of water is recommended. Subsequent slug additions of 1.0 to 2.0 ounces of BONCO ALGAE SLIMICIDE No. 15 per 1000 gallons of water are recommended every 2 to 5 days or as needed. The frequency of addition depends on the amount of bleedoff and the microbiological problem. The amount of bleedoff and the microbiological problem could be made in the sump towers.
