

PRECAUTIONARY STATEMENTS**HAZARD TO HUMANS
& DOMESTIC ANIMALS****CAUTION**

May cause irritation of eyes, nose, throat and skin. Avoid breathing dust. Avoid contact with skin, eyes or clothing. Wash thoroughly after handling.

ENVIRONMENTAL HAZARD

Do not apply directly to any body of water. Do not contaminate water by cleaning of equipment or disposal of waste.

DIRECTIONS FOR USE

It is a violation of federal laws to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL**STORAGE:**

To maximize the shelf life of this product, store in dry areas where the container is not likely to come in contact with moisture.

DISPOSAL:

Do not contaminate water, food or feed by storage or disposal.

Wastes resulting from this product may be disposed of on site or at an approved waste disposal facility.

(For Plastic Buckets) Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose in a sanitary landfill or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

(For Bags) Completely empty bag into application equipment. Then dispose of bag in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WEED BLAST O-XP

WEED KILLER

Active Ingredients

ACTIVE INGREDIENT:	PELLETS	10%
Bromacil (4-bromo-3-sec-butyl-6-methylureacil)		

INERT INGREDIENTS:	BOX	100%

BRUSH CONTROL

To control undesirable woody plants on non-cropland areas such as Railroad Rights of Way, Storage Areas, Industrial Plant Sites and Drainage Ditches.

Apply pellets in spring or early summer as a broadcast or basal (spot) treatment; for use on drainage ditches, apply as a basal (spot) treatment only. Growth of herbaceous vegetation will be prevented in the treated area for an extended period of time. Note: For effective brush control and prevention of damage to desirable vegetation do not apply to brush standing in water, do not use water from treated ditches for irrigation, do not use in irrigation ditches nor right-of-ways or other sites where marketable timber or other desirable trees or shrubs are immediately adjacent to the treated area.

BASAL (SPOT) TREATMENT

To control undesirable woody plants such as cottonwood, buckberry, maple, oak, poplar, red bud, sweet gum, wild cherry, willow and winged elm; apply pellets in spring or early summer by spreading 1 to 2 tablespoonsfuls on the ground (cover an area 16 to 1 sq. ft.) at the base of each brush stem or clump 2 to 4 inches in basal diameter. In larger clumps apply 1 tablespoonful to each of 3 to 6 spaces around the base of the brush. Apply to up to 16 side of stem if ground is not level.

BROADCAST TREATMENT

Apply in spring or early summer: use 60 to 80 lbs. per acre to control oak, willow, sweet gum and pine; use 120 to 240 lbs. per acre to control American elm, winged elm, hickberry and cottonwood.

WEED CONTROL

To control weed weeds for an extended period of time on non-cropland areas such as Equipment Storage Sites, Industrial Sites, Ditch Banks, Around Farm Buildings, or other non-crop areas that are not immediately adjacent to cropland or desirable trees and shrubs.

Apply preemergence or early postemergence to weed growth by spreading Weed Blast 10-XP pellets uniformly over the surface of the ground to be treated. Apply at the following rates; use the higher levels of the dosage ranges on absorbent soils (those high in organic matter & carbon).

Annual Weeds and Grasses, such as foxtail, ryegrass, wild oats, crabgrass, cheatgrass, bromegrass, ragweed, lambs quarters, puncturevine and turkey mullein: use 30 to 60 lbs. per acre.

Perennial Weeds and Grasses, such as smooth brome, Bahiagrass, bluegrass, redtop, purpletop, quackgrass, broomsedge, aster, bindweed, dog fennel, goldenrod, plainsain and wild carrot: use 60 to 120 lbs. per acre. Higher rates of 120 to 240 lbs. per acre are required for Johnsongrass and other hard-to-kill perennials such as Bermudagrass, Vaseygrass, Deliagrass, nutgrass, caltrop, bouncingbet, dogbane, bracken fern and horsetail; apply these high rates only as spot treatments to localized infestations of weeds.

Retreatment—Apply 30 to 60 lbs. per acre when annual weeds and grasses reappear on sites where weed growth has been controlled.

For Small Areas—One-half lb. per 435 sq. ft. is approximately 50 lbs. per acre.

IMPORTANT: Injury to or loss of desirable trees or other plants may result from failure to observe the following: Do not apply (or clean equipment) on or near desirable trees or other plants, or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. Do not use on lawns, walls, driveways, tennis courts, or similar areas. Prevent drift of product to desirable plants. Do not contaminate any body of water. Keep from contact with fertilizers, insecticides, fungicides, and seeds. Thoroughly clean application equipment after use.

Do not re-use bag.

GENERAL INFORMATION:

Weed Blasz 10-XP Bromacid Brush Killer is a pelleted product for dry application to the soil for the control of brush and many annual and perennial weeds. Effects are slow to appear and will not become apparent until the chemical has been activated by moisture. The degree of control and duration of effect will vary with the amount of chemical applied, soil-type, rainfall and other conditions.

Weed Blasz 10-XP is non-corrosive to equipment, non-volatile, and non-flammable.

NOTICE TO BUYER: Seller warrants that this product conforms to the chemical description on the label thereon and is reasonably fit for purposes stated on such label only when used in accordance with directions under normal use conditions. This warranty does not extend to use of this product contrary to label use directions, or under abnormal use conditions, or under conditions not reasonably foreseeable to seller. Buyer assumes all risk of any such use. Seller makes no other warranties, express or implied.
