Unicorn Sequential Insecticide is designed for use in automatically-timed discharging devices. Using the metered valve provided, which gives a dosage of 100 mg. set to discharge every fifteen minutes, one unit will control flies, mosquitoes, gnats and flying moths in an area of approximately 6,000 cubic feet. Factors such as shape of area, temperature, humidity and air currents all affect insect activity and may modify the exact area protected. Insect control will build up within 2 hours after unit is in operation. Used as described, this can contains sufficient insecticide to operate 24 hours a day for 34 days. This will provide for monthly replacement. Any remaining contents may be used manually.

To be used manually, remove cap and direct spray at flies or other insects. To treat entire area, close windows and doors and press actuator button 7 times per 1,000 cubic feet of space while moving about to distribute the spray in the upper portion of the room. Keep room closed for 15 minutes and ventilate before reoccupying.
