#### Mosquito abatement programs:

Dilute **Dursban 1-E** with water according to directions given in the table and apply using suitable power spray equipment in a manner to provide complete and uniform coverage. For best results apply a wetting spray to both upper and lower leaf surfaces. Attempt to penetrate dense foliage but avoid over-spraying to the point of excessive runoff. Treat when mosquitoes appear and repeat at 7 to 10 day intervals, if needed.

**Treatment of Fire Ant Mounds:** Apply **Dursban 1-E** as a drench diluted at the rate of 2 fl. oz. (30 cc) per 2 gallons of water. Gently sprinkle a total of 1 gallon of the diluted solution over the surface of each mound using a sprinkler can. Thoroughly wet mound and surrounding area to a 4 ft. diameter (12 sq. ft.). For best results apply in cool weather 65-80°F, or in early morning or late evening hours. Treat new mounds as they appear. Pressurized sprays may disturb the ants and cause migration, reducing product effectiveness.
