4-7

In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed.

Nonfood areas are areas such as garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).

Do not use in rooms/areas while occupied by patients, the elderly or infirm. Do not apply to classrooms when in use.

SHAKE WELL BEFORE USING

Remove protective cap, hold container upright and spray from a distance of 12 to 15 inches. Remove birds and cover fish aquariums before spraying.

NONAGRICULTURAL USES

Cluster Flies, Houseflies, Fruit Flies, Mosquitoes, Gnats, Wasps, Hornets, Bees, Black Flies, Skipper Flies, Blow Flies and Small Flying Moths: Close all doors and windows and spray at the rate of 1 to 3 seconds per 1000 cubic feet, moving toward the door. Fill room with mist. Direct spray to all parts of the room, especially windows and other light sources which attract these insects. Keep nozzle in constant motion. Leave room and keep area closed for 15 minutes. Open and ventilate before reoccupying. Sweep up and destroy fallen insects. Repeat treatment as necessary.

Ants, Cockroaches, Waterbugs, Palmetto Bugs, Filverfish, Firebrats, Clover Mites, Crickets, Scorpions, Spiders, Millipedes, Centipedes, Sowbugs and Pillbugs: Spray into hiding places such as cracks and crevices, behind sinks, cabinets, meter boxes, door frames, windows, along baseboards and floors, around drains and plumbing, hitting insects with spray whenever possible. Space Spray: Open cabinets and doors in area to be treated. Shut off air: conditioners, fans and close doors and windows before spraying. Spray at rate of 20 seconds per 1000 cu. ft. of space, moving toward the door. Direct spray toward area suspected of harboring the greatest insect infestations. Dispense in all locations contacting as many insects as possible. Leave room and keep area closed for 15 minutes. Open and ventilate before reoccupying. Sweep up and destroy dead insects. Repeat treatment as necessary.

Indian Meal Moths, Angoumois Grain Moths: Close doors and windows, direct spray into all parts of room especially around stored food product containers, pallets and darkened areas. Spray 7 to 10 seconds for each 1000 cubic feet of space, moving toward the door. Leave room and keep area closed for 15 minutes following treakment. Open and ventilate before reoccupying. Sweep up and destroy fallen insects. Repeat application weekly or as necessary.

Exposed stages of Confused Flour Beetles, Cigarette Beetles, Drug Store Beetles, Saw-Toothed Grain Beetles, Red Flour Beetles, Rice Weevils, Granary Weevils, Grain Mites in exposed and larvae stages: Spray into cracks and crevices, processing and handling equipment,

around cartons or containers or other areas where these insects tend to congregate. Contact as many insects as possible. Spray 30 seconds for each 100 square feet of surface. Keep area closed for 45 minutes to 1 hour after treatment. Space Spray: Spray 20 seconds per 1000 cu. ft. of space, moving toward the door. Leave room and keep area closed for 15 minutes following treatment. Repeat application weekly or as necessary. Infested stored food products should be disposed of or treated using an approved product intended for this purpose.

Carpet Beetles: Spray directly on beetles, floors, baseboards, shelves and carpets. Repeat treatment as necessary.

Bedbugs: Spray mattresses, particularly around tufts and seams. Take beds apart and spray into all joints. Treat baseboards, moldings and floors. Repeat treatment as necessary. Allow all sprayed articles to dry thoroughly before use.

To control Clothes Moths and Carpet Beetles on wool and other proteinaceous fibers: Remove infested articles from storage, brush thoroughly, and air for several hours in sunlight, if possible. Apply spray liberally to empty chests, closets, bureaus and other storages directing the spray into cracks, oints and crevices. After airing, infested articles may be treated by spraying lightly, keeping nozzle at least three feet from fabric to avoid staining.

Mud Daubers and Wasp Nests: Spray mist directly on insects and their nests from approximately 2 feet away. Contacted insects will fly away from fog. Applications should be made in late evening when insects are at rest. Spray into hiding and breeding places contacting as many insects as possible.

Fleas in buildings - Directed spray: Hold can 36 inches above floor and direct spray toward floor and lower walls at a rate of 10 seconds per 100 sq. ft. making sure that all floor, sofa and chair surfaces are contacted. Leave room and keep area closed for 15 minutes. Open and ventilate before reoccupying. Allow all sprayed articles to dry thoroughly before use. Repeat treatment after 7 days or as needed.

with special attention to cracks and crevices around baseboards, and window and door frames. Infested upholstered furniture may also be treated with this product. A test application should be made to upholstery or drapery fabrics in an inconspicuous place before use.

To control Fleas, Ticks and Lice on dogs. Starting at the tail, stroke against the lay of the hair, spraying the parted fur in short bursts directly behind the hand to insured penetrating the coat. Dampen the fur up to the head. Repeat application weekly if necessary to control infestations: NOTE: Not recommended for use on puppies less than four weeks cld.

AGRICULTURAL USES:

To control Bees, Deer Flies, Face Flies, Fleas, Gnats, Horn Flies, Hornets, Herse Flies, House Flies, Lice, Mosquitoes, Small Plying Moths, Stable Flies, Ticks and Wasps:

BEST AVAILABLE COPY

MILKING PARLOR AND MILKROOM: Cover milking utensils and milk to prevent contamination from spray and falling dead insects. Close windows and doors and direct fog upward in all directions at a rate of 1 to 3 seconds per 1000 cubic feet of space, moving toward the door. Leave room and for best results, keep area closed for 15 minutes after spraying. Do not remain in treated area. Open and ventilate after treatment is completed.

LIVESTOCK USE (DO NOT USE ON SICK ANIMALS): From approximately 2 feet away, thoroughly spray entire animal as it is being released to pasture. Do not spray directly toward animal's eyes. Spot treat withers, shoulders and back where saliva accumulates from head tossing. Apply for 2 to 4 seconds per animal. Repeat daily or as needed. To control Blood Sucking Lice, apply to the infested areas of the animal, using a still brush to get the spray to the base of the hair. Repeat every 3 weeks if required.

In Stanchion Barns:

Walk behind animals and direct spray over backs allowing 1 second per animal. Apply each morning for best results.

In Beef, Cattle, Goat, and Sheep Operations, Horse Barns and Stables:

Close all windows and doors, and spray at a rate of 1 to 2 seconds per 1000 cu. ft. If area cannot be closed, double the dosage. Leave room and keep area closed for 15 minutes following application. Ventilate area after treatment is complete. FOR ANIMAL APPLICATION (Do not use on sick animals), from approximately 2 feet away, thoroughly spray entire animal, preferably as it is being released to pasture. Do not spray directly toward animal's face or eyes. Apply for 2 to 4 seconds per animal. Repeat daily or as needed. To control Blood Sucking Lice, apply to the infested areas of the animal, using a stiff brush to get the spray to the base of the hair. Repeat every 3 weeks if required.

In Poultry Operations:

Use only in unoccupied poultry houses when birds are not present. Close all windows and doors, and spray at a rate of 1 to 2 seconds per 1000 cu. ft. moving toward the door. If area cannot be closed, double the dosage. Leave room and keep area closed for 15 minutes following application. Ventilate area after treatment is complete. Treat daily or as needed.

To control **Poultry Lice**, spray roosts, walls and nests or cages thoroughly. This should be followed by spraying over the birds with a fine mist.

For control of Bedbugs and Mites in poultry houses, spray crevices of roost poles, cracks in walls, and cracks in nests where the bedbugs and mites hide.

In Hog Operations:

Close windows and doors and direct fog upward in all directions at a rate of 1 to 2 seconds per 1000 cubic feet of space, moving toward the door. If area cannot be closed, double the dosage. Leave room and for best results, keep area closed for 15 minutes after spraying. Do not remain in treated area. Open and ventilate after treatment is completed.
