[CONSUMER INFORMATION]

This container treats approximately:

130 weeds (16 oz) / 165 weeds (20 oz) / 200 weeds (24 oz) / 250 weeds (32 oz) /

400 weeds (48 oz) / 500 weeds (64 oz) / 800 weeds (96 oz) / 1000 weeds (128 oz) / 1300 weeds (170 oz) / 2100 weeds (256 oz) / 2600 weeds (320 oz)]

[This container covers approximately xx sq ft] (varies with container size) (values may be reduced if large harder-to-control brush species are claimed/treated) [This product [product name] eliminates nearly all common weeds and grasses.] [Illustrations]

[Important: This product is a non-selective herbicide and will kill all vegetation contacted. This herbicide kills plants by inhibiting the production of a substance found only in plants. It enters plants through the sprayed foliage and moves down to the roots. Avoid direct spray or drift onto desirable plants, lawn grasses, shrubs and trees. Any product not absorbed by the plant is broken down into natural materials. This product has no soil activity and thus will not affect nearby untreated plants.]

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read and follow label instructions and all precautionary statements.

This product is a general purpose [non-selective] weed and grass killer for control of unwanted vegetation in driveways, walkways, curbs, along fences and foundations, near trees and shrubs, flower beds, mulch beds, and other similar garden areas [similar areas of the yard]. This product is not recommended for use in lawns because it will kill lawn grasses too.

Protect desirable plants and vegetation with a piece of plastic or cardboard. If desirable plants are accidentally sprayed, wash plants with water immediately. Do not mow, cut or otherwise disturb treated vegetation for at least 7 days following application.

[When to use] [When to apply]: Apply when weeds are actively growing. It is best to apply on a warm sunny day when daytime temperatures are above 60° F and no rain is forecasted for 24 hours. Re-apply if rain occurs with 24 hours after application. To avoid drift to desirable plants, apply when the air is calm.

[How to use] [Application Instructions] [How to apply]: This product [product name] is premixed, pre-measured and ready to use. [To re-fill empty container, see REFILLING INSTRUCTIONS.] This product is formulated for "spot" treatment of individual weeds and grasses. Apply with a plastic, aluminum or stainless steel tank-type sprayer. Adjust nozzle to make a coarse spray. Do not apply with galvanized or unlined steel sprayer, or through any irrigation system or sprinkling can.

Make application when the air is calm. Position the sprayer-tip approximately 1-2 feet from the target weed and apply to the foliage. Thoroughly wet the foliage of the target weeds and grasses. Do not overspray. A single application of product controls most listed weeds. Sprayed plants begin yellowing and wilting within about 1 week, with a complete kill, including the roots, in 2 to 4 weeks. Harder-to-control weeds may require a repeat application after 4 weeks.

(Optional Edger Sprayer text)

[This product [product name] is an easy edger for use along driveways, walkways, sidewalk cracks, around landscaping, ornamentals, trees, and shrubs. Use in larger areas such as patios and brick and gravel walks.

To use: Remove cap and fasten the built-in sprinkler applicator. For edging, turn container upside down. Walk slowly holding nozzle 2 to 6 inches above weeds and grasses [area to be treated]. Thoroughly wet the foliage of the unwanted vegetation. A one-gallon container covers a 2 inch band 1200 feet long. For larger area coverage, adjust the width of the spray pattern by varying the height of the container.]

REPLANTING INSTRUCTIONS

Ornamental trees, shrubs and flowers may be planted 1 day after application.
