[This container covers approximately xx sq ft] *[varies depending on container size]*

[This product *[product name]* eliminates nearly all common weeds and grasses.]

[Important: This product is a non-selective herbicide and will kill all vegetation contacted. This herbicide kills unwanted plants by inhibiting the production of a substance found only in plants. It enters plants through the sprayed foliage and moves down to the roots. Avoid direct spray or drift onto desirable plants, lawn grasses, shrubs and trees. Any product not absorbed by the plant is broken down into natural materials. This product has no soil activity and thus will not affect nearby untreated plants.]

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read the entire panel before using this product. Use only according to label instructions.

This product is a general purpose [non-selective] weed and grass killer for control of unwanted vegetation in driveways, walkways, curbs, along fences and foundations, near trees and shrubs, flower beds, mulch beds, and other similar areas of the lawn and garden. This product is not recommended for use in lawns because lawn grasses will be killed too.

Protect desirable plants and vegetation with a piece of plastic or cardboard. If desirable plants are accidentally sprayed, wash plants with water immediately. Do not mow, cut or otherwise disturb treated vegetation for at least 7 days following application.

[When To Use] [When to Apply] [For Best Results] [For Maximum Effectiveness]

Apply to actively growing weeds, preferably before the seed heads form. It is best to apply on a warm sunny day when daytime temperatures are above 60° F and there is no rain forecasted for 24 hours. Reapply if it rains within 24 hours of application. Apply when the wind is calm. Weed control is accelerated by warm sunny weather.

[How To Use] [How to Apply] [Application Instructions]

This product [*product name*] is pre-mixed, pre-measured and ready to use. [To re-fill empty container, see **REFILLING INSTRUCTIONS**.] This product is formulated for spot treatment to individual weeds. Adjust the nozzle to make a coarse spray. (OR) [For the Pull 'N Spray™ or Fast & Easy Pressure Sprayer, adjust nozzle to deliver a narrow or wide spray appropriate for the job.] Hold sprayer about 1-2 feet from the weed. Thoroughly wet the foliage of the target weeds and grasses. Do not overspray. The weed killer moves systemically through the plant for effective control. Visible effects usually occur within 1 week on most weeds, with complete kill in 2 to 4 weeks. Hard-to-control weeds may require a second application after 4 weeks.

REPLANTING INSTRUCTIONS

Ornamentals and flowers can be re-seeded or transplanted 1 day after application.
