Schaumburg, Illinois 60173

Subject: Label Amendment - Registration Review Mitigation for Permethrin

Product Name: UNICORN MULTI-USE .25% PERMETHRIN DUST

EPA Registration Number: 28293-352

Application Date: 12/29/2020 Decision Number: 569312 Case Number: 475921

Dear James McFadden:

The Agency, in accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, has completed reviewing all the information submitted with your application to support the Registration Review of the above referenced product in connection with the Permethrin Interim Decision, and has concluded that your submission is acceptable. The label referred to above, submitted in connection with registration under FIFRA, as amended, is acceptable.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

Page 2 of 2 EPA Reg. No. 28293-352 Decision No. 569312

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling and must be used at your next label printing. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 12 months from the date of this letter. After 12 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

If you have any questions about this letter, please contact Carolyn Smith via email at smith.carolyn@epa.gov.

Sincerely,

Jaclyn Pyne, Team Leader

Jolyn Pyrie

May 1, 2025 - revised

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-222-1222 [xxx-xxx-xxxx] for emergency medical treatment information.

PRECAUTIONARY STATEMENTS Hazards to Humans and Domestic Animals

CAUTION: Harmful if absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing.

PERSONAL PROTECTIVE EQUIPMENT:

Some materials that are chemical resistant to this product are barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, natural rubber, polyethylene, polyvinyl chloride, viton. If you want more options, follow the instructions for category A on an EPA chemical resistance category selection chart.

Loaders, applicators, and other handlers must wear:

- Long sleeved shirt and long pants
- Shoes plus socks
- Chemical resistant gloves

Wear a minimum of a NIOSH-approved particulate filtering facepiece respirator with any R or P filter; OR a NIOSH-approved elastomeric particulate respirator with any R or P filter; OR a NIOSH-approved powered air purifying respirator with HE filters.

Application with aerial or motorized ground equipment is prohibited.

USER SAFETY RECOMMENDATIONS

User should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

User should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

User should remove PPE immediately after handling this product. As soon as possible, wash thoroughly and change into clean clothing.

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them.

Environmental Hazards

This pesticide is extremely toxic to aquatic organisms, including fish and invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean water mark. Do not apply when weather conditions favor drift from treated areas. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment wash waters.

Under some conditions, it may also have a potential for transport into surface water in runoff (primarily absorbed to suspended soil particles), for several months or more after application. These include poorly draining or wet soils with readily visible slopes toward adjacent surface waters, frequently flooded areas, and areas overlying extremely shallow groundwater, with infield canals or ditches that drain to surface water, areas not separated from adjacent surface waters with vegetated filter strips, and areas over-lying tile drainage systems that drain to surface waters.

This pesticide is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

Physical or Chemical Hazards

Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For Indoor Use Only

RESISTANCE-MANAGEMENT

For resistance management, the Unicorn Multi-Use .25% Permethrin Dust contains Group 3A insecticides. Any insect population may contain individuals naturally resistant to the Unicorn Multi-Use .25% Permethrin Dust and other Group 3A insecticides. The resistant individuals may dominate the insect population if this group of insecticides are used repeatedly. Appropriate resistance-management strategies should be followed. To delay insecticide resistance, take the following steps:

- Rotate the use of the Unicorn Multi-Use .25% Permethrin Dust or other Group 3A insecticides with different groups that control the same pests.
- Adopt an integrated pest management program for insecticide use that includes scouting, uses historical information related to pesticide use, record keeping and which considers cultural, biological and other chemical control practices.
- Monitor after application for unexpected target pest survival. If the level of survival suggests the presence of resistance, consult with your local university specialist or certified pest control advisor.
- Contact your local extension specialist for any additional pesticide resistance-management

EPA Reg. No. 28293-352

EPA Est. No. 58996-MO-1_A; 44616-MO-1_B; 44616-GA-1_C

and/or IPM recommendations for the specific site and pest problems in your area.

For further information or to report suspected resistance, contact Phaeton at 1-800-XXX-XXXX.

Restrictions

Do not make applications during rain. Avoid making applications when rainfall is expected before the product has sufficient time to dry (minimum 4 hours). Rainfall within 24 hours after application may cause unintended runoff of pesticide application. Do not apply when the wind speed is greater than 15 mph. Do not water the treated area to the point of run-off.

Use of handheld power duster equipment is prohibited. Except when treating livestock, do not apply this product in a way that will contact workers or other persons, either directly or through drift. Except when treating livestock, only protected handlers may be in the area during application. Do not breathe dusts. Application is prohibited directly into sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.

When used in dairy barns or facilities: close milk bulk tank lids to prevent contamination from dust and from dead or falling insects. Remove or cover milking utensils before application. Wash teats of animals before milking.

Follow proper disposal procedures on this label. Siga las indicaciones del etiquetado para el desecho apropiado del producto.

BEEF AND DAIRY CATTLE AND HORSES:

Can be used in dust bags, shaker can and mechanical dust applicator. Horn Flies, Lice, Face Flies: Place contents of this package in any commercially available dust bag, suspend bag in areas frequented by cattle or in gateways or lanes through which the animals must pass daily for water, feed, or minerals. Bags may also be placed in loafing sheds or in front on mineral feeders. For dairy cows, bags may be suspended in the exit through which the cows leave the milking barn. The bags should hang 4 to 6 inches below the back line of the cattle. For reduction of Face Flies, bags must be located so animals will be forced to use them daily and hung at a height so that the face is dusted. Horn Flies, Lice - Direct Application: Apply 2 oz. of dust per animal by shaker can over the head, neck, shoulders and back and tail head.

HORSES: Dust horse for Hornflies with shaker can or dust glove along back, neck and legs.

SWINE: Lice on Swine - Direct Application: Apply only 1 ounce per head as a uniform coat to the head, should and back by use of a shaker can or suitable mechanical dust applicator. Repeat as necessary, but not more often than once every 10 days. In severe infestation, both animals and the bedding may be treated. Do not ship animals for slaughter within 5 days of treatment.

POULTRY: To control Northern Fowl Mites, apply at a rate of ½ lb per 25 birds. Ensure thorough treatment of vent area.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

Pesticide Storage: Store in a cool, dry area under lock and key. Post as a pesticide storage area. Always store pesticides in the original container. Store away from food, pet food, feed, seed, fertilizers, and veterinary supplies. Place liquid formulations on lower shelves and dry formulations above.

Pesticide Disposal: To avoid wastes, use all material in this container by application according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry). Do not pour or dispose down-the-drain or sewer. Call your local solid waste Agency for local disposal options.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Completely empty can by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then offer for recycling, if available, or puncture and dispose of in a sanitary landfill.

NOTICE: To the extent consistent with applicable law, buyer assumes all responsibility for safety and use not in accordance with directions.

PRECAUTIONARY STATEMENTS Hazards to Humans and Domestic Animals

CAUTION: Harmful if absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

All cat warning labels will be placed within a shaded box within the Precautionary Statements on the label. The coloring of the box and text will be such to provide a contrasting color to other label text. The shaded box must contain the following.

"DO NOT USE ON CATS. May be toxic or potentially fatal if applied to or ingested by cats. Accidental application to cats and/or grooming a recently treated dog may result in tremors and/or uncoordinated muscle movements. If this occurs, immediate veterinary care should be provided."

Each label must include at least one cat slash icon. This icon may be in the shaded box or in other areas on the label.

Each individual tube must be labeled with the "DO NOT USE ON CATS' statement or cat slash icon.

Environmental Hazards

This pesticide is extremely toxic to aquatic organisms, including fish and invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide of the treatment area. This pesticide is highly toxic to bees exposed to direct treatment

medical treatment information.

on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

Physical or Chemical Hazards

Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For Both Indoor and Outdoor Use

Restrictions

Do not make applications during rain. Avoid making applications when rainfall is expected before the product has sufficient time to dry (minimum 4 hours). Rainfall within 24 hours after application may cause unintended runoff of pesticide application. Do not apply when the wind speed is greater than 15 mph.

Do not water the treated area to the point of run-off. Use of handheld power duster equipment is prohibited. Except when applying to pets, companion animals or non-commercial livestock, do not apply this product in a way that will contact adults, children or pets, either directly or through drift. Except when applying to pets, companion animals or non-commercial livestock, do not allow adults, children, or pets to enter the treated area until dusts have settled. Do not breathe dusts.

Application is prohibited directly into sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.

Follow proper disposal procedures on this label.

Siga las indicaciones del etiquetado para el desecho apropiado del producto.

Applications to dogs and livestock must be done indoors. ON PETS, COMPANION ANIMALS AND NON-COMMERCIAL LIVESTOCK:

Consult a veterinarian before using this product on debilitated, aged, pregnant or nursing animals or animals on medication. Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

PETS - USE ON DOGS ONLY. DO NOT USE ON CATS.

To control Fleas, Ticks and Lice on Dogs, dust animals thoroughly, working the dust into the hair down to the skin. Pay close attention to legs and feet. Use ½ oz. on animals 20 pounds and under and 1 oz. on pets over 20 pounds. Avoid getting dust in pet's eyes. Reapply every two (2) weeks as needed. Do not use on dogs under twelve (12) weeks of age. Dust sleeping area including bedding and cracks and crevices.

EPA Reg. No. 28293-352

EPA Est. No. 58996-MO-1_A; 44616-MO-1_B: 44616-GA-1_C

CATTLE AND HORSES:

Can be used in dust bags, shaker can and mechanical dust applicator. Horn Flies, Lice, Face Flies: Place contents of this package in any commercially available dust bag, suspend bag in areas frequented by cattle or in gateways or lanes through which the animals must pass daily for water, feed, or minerals. Bags may also be placed in loafing sheds or in front on mineral feeders. For dairy [milk] cows, bags may be suspended in the exit through which the cows leave the milking barn. The bags should hang 4 to 6 inches below the back line of the cattle. For reduction of Face Flies, bags must be located so animals will be forced to use them daily and hung at a height so that the face is dusted. Horn Flies, Lice - Direct Application: Apply 2 oz. of dust per animal by shaker can over the head, neck, shoulders and back and tail head.

HORSES: Dust horse for Hornflies with shaker can or dust glove along back, neck and legs.

SWINE: Lice on Swine - Direct Application: Apply only 1 ounce per head as a uniform coat to the head, should and back by use of a shaker can or suitable mechanical dust applicator. Repeat as necessary, but not more often than once every 10 days. In severe infestation, both animals and the bedding may be treated. Do not slaughter animals within 5 days of treatment.

POULTRY: To control Northern Fowl Mites, apply at a rate of ½ lb per 25 birds. Ensure thorough treatment of vent area.

HOME GARDENS: For Use on Home Gardens. Not for Use on Plants being grown for Sale or other Commercial Use.

[HOW TO APPLY]

Wearing household latex or rubber gloves, use a dust applicator such as a shaker can, dust gun, puffer or other bulbous duster, rotary duster or other appropriate duster as available. [Wearing household latex or rubber gloves, open shaker side of cap and shake gently to apply. (directions to be used when packaged in an applicator container – the statement used depends upon type of container packaged.)] Dust lightly to cover both upper and lower leaf surfaces with a thin, even film of dust. (Many insects hide on the underside of the leaf). Apply when air is calm to avoid drift and contact with eyes and skin. Controls a wide range of insect pests.

[WHEN TO APPLY]

Use at first signs of insect infestation, preferably before damage from feeding occurs. Note the pre-harvest (time between use and harvest) interval with each crop listed.
