FOR THE USE OF SOIL FUMIGATION

HY YIELD, INC.

Many pesticidal chemicals are poisons and may leave a toxic residue on the plants to which they are applied. The U. S. Food Drug Administration has established maximum amounts of such pesticidal chemicals that may remain on raw agricultural products at harvest, and it is the user's responsibility to see that there is no residue on such crops at harvest in excess of these amounts. The "Fumigation Directions" are based on the best available information, and if followed carefully should not leave excessive residues at harvest. However, Hy Yield, Inc. assumes no responsibility as to their accuracy nor for any loss due to excessive residues.

Seller warrants that the product conforms to its chemical description and is reasonable for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions or under abnormal conditions or under conditions not reasonably foreseeable to Seller and Buyer assumes the risk of any such use.

Empty cylinders should be returned freight collect to Hy Yield, Inc. Location from which the shipment was made. Consult local sales office if question arises.
