DIRECTIONS FOR USE

For rapid control of cockroaches, flies, gnats, fruit flies, house flies, and mosquitoes (and other flying insects) and weevils (including rice weevils).
 Apply in a good sprayer adjusted to deliver a coarse wet spray, at a rate of 1 gallon to 750 square feet of surface. Direct spray into loca-
 tions where these insects are found; garbage compactors, garbage
 chutes and cans, into cracks and crevices, dark corners, behind and
 beneath sinks, stoves, refrigerators, and cabinets, along baseboards,
 and around door and window frames. Spray out trails, nests and points
 of entry. Spray insects directly wherever possible.

In case of infested foods in cabinets, dispose of the infested material.
 Remove all contents and clean thoroughly. Spray interior surfaces of
 empty cabinets thoroughly. After spray has dried, cover shelves with
 paper or otherwise protect foods from direct contact with sprayed sur-
 faces.

Repeat treatment if reinfestation occurs.

To kill fruit flies, mosquitoes, gnats, house flies, and weevils: Close windows and doors and
 shut down ventilating systems. Remove pets, birds and cover
 fish tanks before spraying. Apply as a fine mist using a
 low-atom sprayer. Thoroughly fill the area with mist with
 special attention to light sources which attract these in-
 sects. Keep area closed for 15 minutes. Vacate treated
 area and ventilate before reoccupying.

CAUTION: Harmful if swallowed. Foods should be removed or cover-
 ed during treatment. All food processing surfaces should be covered
 during treatment or thoroughly cleaned before using. The use of this
 product in food processing plants should be confined to time periods
 when the plant is not in operation.

This product may be toxic to fish. Do not contaminate water by
 cleaning of equipment or disposal of wastes. Apply only as
 specified on this label.

Do not reuse this container. Destroy by perforating or crush-
 ing and burying in a safe place.
