Subject: Non-PRIA (Pesticide Registration Improvement Act) Labeling Amendment –To delete the registration expiration date and make other minor revisions to the label
Product Name: 4114 Maize
EPA Registration Number: 29964-17
Application Date: June 26, 2015
OPP Decision Number: 509301

Dear Mr. Staley:

The amended labeling referred to above, submitted in connection with registration under Sec. 3(c)(5) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable and the registration expiration date has been deleted.

This approval does not affect any terms or conditions that were previously imposed on this registration. You continue to be subject to existing terms or conditions on your registration and any deadlines connected with it.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling.

Should you wish to add/retain a reference to your company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the U.S. Environmental Protection Agency (EPA). If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA-approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

EPA Reg. No. 29964-17
OPP Decision No. 509301

Your release for shipment of this product constitutes acceptance of these terms. If these terms are not complied with, this registration will be subject to cancellation in accordance with FIFRA section 6.

If you have any questions, please contact Ann Sibold of my team by phone at (703) 305-6502 or via email at sibold.ann@epa.gov.

Sincerely,

Enclosure

4114 Maize
(OECD Unique Identifier: DP-ØØ4114-3)

Active Ingredients:

Bacillus thuringiensis Cry1F protein and the genetic material (PHP27118 T-DNA)
necessary for its production in corn event DP-ØØ4114-3 ≤0.0015%*

Bacillus thuringiensis Cry34Ab1 protein and the genetic material (PHP27118 T-DNA)
necessary for its production in corn event DP-ØØ4114-3 ≤0.0064%*

Bacillus thuringiensis Cry35Ab1 protein and the genetic material (PHP27118 T-DNA)
necessary for its production in corn event DP-ØØ4114-3 ≤0.0100%*

Other Ingredients:

Phosphinothricin acetyltransferase (PAT) protein and the genetic material (PHP27118 T-DNA)
necessary for its production in corn events DP-ØØ4114-3 ≤0.0011%*

* Percentage (wt/wt) on a dry wt. basis for whole plant

KEEP OUT OF REACH OF CHILDREN

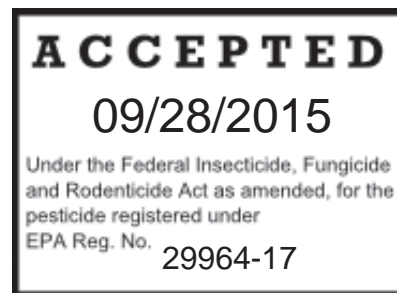

CAUTION

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in any manner inconsistent with its labeling.

This plant-incorporated protectant (PIP) may be combined through conventional breeding with other registered plant-incorporated protectants that are similarly approved for use in combination, through conventional breeding, with other registered plant-incorporated protectants to produce inbred corn lines and hybrid corn varieties with combined pesticidal traits.

4114 maize may be used for breeding purposes, agronomic testing, increasing inbred seed and producing hybrid seed corn up to a total of 20,000 acres per county and up to a combined United States (U.S.) total of 250,000 acres per plant-incorporated protectant active ingredient per registrant per year. Harvested seed are not allowed for sale as commercial seed in the U.S. under the conditions of this registration, but any non-treated seed (i.e., seed without a seed treatment applied) containing 4114 may be sold commercially as grain.
