Jamie Staley  
U.S. Registration Manager  
Pioneer Hi-Bred International, Inc.  
7100 NW 62<sup>nd</sup> Avenue  
Johnston, IA 50131

Subject: Non-PRIA (Pesticide Registration Improvement Act) Labeling Amendment –To extend the expiration date, update the primary brand name and make other minor label revisions  
Product Name: Qrome™  
EPA Registration Number: 29964-21  
Application Date: June 26, 2015  
OPP Decision Number: 506627

Dear Mr. Staley:

The amended labeling referred to above, submitted in connection with registration under Sec. 3(c)(7)(A) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable and the expiration date of the registration has been hereby extended to January 31, 2016.

This approval does not affect any terms or conditions that were previously imposed on this registration. You continue to be subject to existing terms or conditions on your registration and any deadlines connected with it.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling.

Should you wish to add/retain a reference to your company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the U.S. Environmental Protection Agency (EPA). If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains false

EPA Reg. No. 29964-21

OPP Decision No. 506627

or misleading statements or claims substantially differing from the EPA-approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

Your release for shipment of this product constitutes acceptance of these terms. If these terms are not complied with, this registration will be subject to cancellation in accordance with FIFRA section 6.

If you have any questions, please contact Ann Sibold of my team by phone at (703) 305-6502 or via email at [sibold.ann@epa.gov](mailto:sibold.ann@epa.gov).

Sincerely,

# Qrome™

(OECD Unique Identifier: DP-ØØ4114-3xMON-ØØ81Ø-6xSYN-IR6Ø4-5)

## Active Ingredients

*Bacillus thuringiensis* Cry1F protein and the genetic material (PHP27118 T-DNA)  
necessary for its production in corn event DP-ØØ4114-3 ..... ≤0.0012%\*

*Bacillus thuringiensis* Cry34Ab1 protein and the genetic material (PHP27118 T-DNA)  
necessary for its production in corn event DP-ØØ4114-3 ..... ≤0.0096%\*

*Bacillus thuringiensis* Cry35Ab1 protein and the genetic material (PHP27118 T-DNA)  
necessary for its production in corn event DP-ØØ4114-3 ..... ≤0.0042%\*

*Bacillus thuringiensis* Cry1Ab protein and the genetic material (vector PV-ZMBK07)  
necessary for its production in corn event MON-ØØ81Ø-6 ..... ≤0.0011%\*

*Bacillus thuringiensis* mCry3A protein and the genetic material (via elements of pZM26)  
necessary for its production in corn event SYN-IR6Ø4-5 ..... ≤0.0008%\*

## Other Ingredients

Phosphinothricin acetyltransferase (PAT) protein and the genetic material (PHP27118 T-DNA)  
necessary for its production in corn event DP-ØØ4114-3 ..... ≤0.00088%\*

Phosphomannose isomerase (PMI) protein and the genetic material (via elements of pZM26)  
necessary for its production in corn event SYN-IR6Ø4-5 ..... ≤0.00076%\*

## DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

The plant-incorporated protectant must be used as specified in the terms and conditions of the registration.

Qrome™ consists of up to 95% 4114xMON810xMIR604 maize and a minimum of 5% non-*Bt* seed blended together in a bag of seed. This product controls above- and below-ground pests of maize, and the blended non-*Bt* plants provide refuge for both lepidopteran and corn rootworm pests.

## INSECT RESISTANCE MANAGEMENT

Growers are instructed to read information on insect resistance management.

Corn seed bags or bag tags for products containing Qrome products must include the refuge size requirement in text and graphical format.

The following information regarding refuge placement for commercial production must be included in the Grower Guide:

### Corn Belt/Non-Cotton Growing Regions

Qrome contains a Lepidopteran and corn rootworm refuge that is “in the bag” and is automatically implemented when the grower plants the product. No additional refuge is required when planting this product where corn earworm is not a significant pest. **An external 20% lepidopteran refuge is required in cotton-growing regions where corn earworm is a significant pest.**

### Cotton-Growing Region Refuge Requirements

In cotton-growing regions where corn earworm is a significant pest:

- The 20% refuge must be planted with non-*Bt* corn hybrids.
- Qrome should be sown on the same day, or with the shortest window possible between planting dates.
- External refuges may be planted as an in-field or adjacent (e.g., across the road) refuge or as a separate block within 1/2 mile of the Qrome corn field.
- In field refuge options include: blocks, perimeter strips (i.e., along the edges or headlands), or in-field strips.
- When planting the refuge in strips across the field, refuges must be at least four (4) rows wide.
- Insecticide treatments for control of European corn borer, corn earworm, southwestern corn borer, fall armyworm, black cutworm, western bean cutworm, lesser corn stalk borer, southern corn stalk borer, and sugarcane borer may be applied only if economic thresholds are reached for one or more of these target pests. In addition, the refuge can be protected from CRW damage by an appropriate seed treatment or soil insecticide; however, insecticides labeled for adult CRW control must be avoided in the refuge during the period of CRW adult emergence. Economic thresholds will be determined using methods recommended by local or regional professionals (e.g., Extension Service agents, crop consultants). Microbial *Bt* insecticides must not be applied to non-*Bt* corn refuge plants.
- Cotton-growing areas include the following states: Alabama, Arkansas, Georgia, Florida, Louisiana, North Carolina, Mississippi, South Carolina, Oklahoma (only the counties of Beckham, Caddo, Comanche, Custer, Greer, Harmon, Jackson, Kay, Kiowa, Tillman, Washita), Tennessee (only the counties of Carroll, Chester, Crockett, Dyer, Fayette, Franklin, Gibson, Hardeman, Hardin, Haywood, Lake, Lauderdale, Lincoln, Madison, Obion, Rutherford,

Shelby, and Tipton), Texas (except the counties of Carson, Dallam, Hansford, Hartley, Hutchinson, Lipscomb, Moore, Ochiltree, Roberts, and Sherman), Virginia (only the counties of Dinwiddie, Franklin City, Greensville, Isle of Wight, Northampton, Southampton, Suffolk City, Surrey, Sussex) and Missouri (only the counties of Dunklin, New Madrid, Pemiscot, Scott, Stoddard).
