200 P.P.M. 1 oz. for every 2 gallons of water.
150 P.P.M. 1 oz. for every 3 gallons of water.
100 P.P.M. 1 oz. for every 4 gallons of water.

- 1 Scrape and prewash utensils.
- 2 Wash with soapy solution
- 3 Rinse with clear water
- 4 Sanitize with a solution of 1 ounce So-White 6.40 to 4 gallons of water (100 ppm). Immerse all utensils for at least two minutes or for a contact time specified by governing sanitary code. Do not rinse with water.
5. Place sanitized utensils on a rack or drainboard to air dry

Test sanitizing solution frequently with a suitable chlorine test kit, and maintain at least 50ppm available chlorine.

Buyer assumes all risk of use, storage or handling of this material not in strict accordance with directions given here or with established safe practices.

STORAGE AND DISPOSAL:

STAYING POWER FOR SHEL: The company's 1997 earnings were down 10 percent from 1996, but its 1998 earnings are expected to be up 10 percent from 1997. "We're in a very strong position," says a Shell spokesman. "We're not in a position where we're going to be forced to raise prices or cut costs. We're in a position where we can continue to invest in our business and continue to grow."
