

Cross-infection is of major housekeeping concern not only in hospitals, but in schools, institutions, and industry. GUARDIAN is formulated for this problem area. It both cleans and disinfects effectively and is virucidal when used as directed. Its hard surface disinfection action will reduce the hazard of cross-infection from environmental surfaces.

When used as directed, GUARDIAN will deodorize toilet areas, behind and under sinks and counters, garbage cans and garbage storage areas, and other places where bacterial growth can cause mal odors.

This product is economical to use because it is highly concentrated and should be handled with care.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution; or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, as well as oxygen and measures to support breathing manually or mechanically may be needed. If persistent, convulsions may be controlled by the cautious intravenous injection of a short-acting barbiturate drug.

USE DIRECTIONS

Add ½ ounce (1 tablespoon) per gallon of water. Apply GUARDIAN to walls, floors, and other hard surfaces such as tables, chairs, and bed frames with a cloth or mop. For heavily soiled areas, a preliminary cleaning may be required.

At ½ ounce (1 tablespoon) per gallon use-level, GUARDIAN is effective against Pseudomonas aeruginosa, Staphylococcus aureus, Salmonella choleraesuis, and Trichophyton interdigitale, the athlete's foot fungus. Germicidal performance against the first three organisms has been confirmed by the AOAC Use-Dilution test. Fungicidal performance against T. interdigitale was determined by the AOAC Fungicidal test.

The broad spectrum effectiveness of GUARDIAN is shown by its germicidal action against the following additional organisms.

- Escherichia coli
- Klebsiella pneumoniae
- Aerobacter aerogenes (enterobacter)
- Salmonella schottmuelleri
- Streptococcus faecalis
- Shigella dysenteriae
- Brevibacterium ammoniagenes

*At ½ ounce (1 tablespoon) per gallon use-level, GUARDIAN is virucidal against Herpes Simplex (a member of the citrus family that causes infectious mononucleosis), Vaccinia (representative of the pox viruses), and Influenza A₂ as represented by the strains commonly called the Hong Kong Flu and the London Flu Virus, on inanimate environmental surfaces.

Rinse empty container with water before discarding.
