

Read Label Carefully Before Using:

Description

General Purpose Insecticide is highly effective against Flies, Mosquitoes, Gnats, Fleas, Roaches, Waterbugs, and Flying Moths. Milers. This ready to use insecticide can be applied with standard sprayers as well as with thermofoggers. General purpose insecticides can be used both indoors and outdoors.

Directions:

I. Indoor Applications: Flies, Mosquitoes, Gnats, Fleas, and Flying Moths — Close all doors and windows to area to be treated. Foods should be removed or carefully covered during treatment. All food processing surfaces and utensils should be carefully covered during treatment or thoroughly cleaned with detergent and water before using. When using this product in food processing areas, apply only when plant is not in operation. Use equipment that will supply a good fine mist. Discharge spray mist vigorously in all parts of room, using about two ounces for each 1000 cubic feet of space until room is filled with mist, then leave room. **Do not** remain in treated area. Keep windows and doors closed at least 15-30 minutes. Ventilate the area for two (2) hours after treatment is completed. Repeat applications as needed.

Contact Spray - (Flies, Mosquitoes, Roaches, Waterbugs and Gnats — Apply at the rate of 1½ gallons per 1000 square feet surface area. Thoroughly wet surfaces of resting places as well as cracks and crevices. Allow to dry thoroughly.

II. Outdoor Applications:

Fogging — This product is ready for use in foggers. Adjust to "Dry Fog" mist. When fogging, make application in still air about dusk when wind is less than five (5) M.P.H. and the ground temperature is lower than the air a few feet above ground level. Do not fog near fire or open flame. Keep fog out of any body of water.

Wasps — Applications should be made in late evening when insects are at rest. Spray liberally into hiding and breeding places, contacting as many insects as possible. Repeat as necessary.
