

DIRECTIONS FOR USE

Add ALGICIDE 10% directly to pool water or sprinkle around the edge of the pool as follows:

Initial Dose: 1 gallon of ALGICIDE 10% to 50,000 gallons of water.

Maintenance Dose: 1 quart of ALGICIDE 10% to 50,000 gallons of water.

Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algal debris. If visible algae are still present or reappear, repeat the treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance dose.

Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If make-up water is added at the rate of more than 10,000 gallons per week, add 1 quart of ALGICIDE 10% for each 10,000 gallons of fresh make-up water added per week.

FISH AND/OR WILDLIFE PRECAUTIONS

This product is toxic to fish. Treated effluent should not be discharged directly into streams, lakes, or streams or into public water. Apply this product only as specified on this label.

CONTAINER DISPOSAL

Rinse empty container thoroughly with water and do not reuse.

ALGICIDE 10%

Concentrated Swimming Pool Algaecide

CONTROLS

ALGICIDE 10% AND ALGAL SLIME IN SWIMMING POOLS

When ALGICIDE 10% is used as directed, it will kill and prevent development of Chlorococcoides (green), Phormidium mundatum (black algae), Phormidium retzii (Square D algae), Lyngbya versicolor (blue-green) and other swimming pool algae.

ALGICIDE 10% is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other cleaners, or pre-mixed with other water treating chemicals. ALGICIDE 10% works best when added by itself directly to pool water. ALGICIDE 10% at use dilution is non-corrosive to inanimate surfaces.

DANGER

Keep Out of Reach of Children. Corrosive. Causes severe eye and skin damage. Do not get in eyes, skin or on clothing. Harmful or fatal if swallowed. Wear goggles or face shield and rubber gloves when handling. Avoid contamination of food.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. If eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink milk or whites, or other solution. If these are not available, drink large quantities of water. Avoid food and call physician.

NOTE TO PHYSICIAN

Probable mucous membrane irritation with use of product. Avoid use of product in areas of contact with mucous membranes. Respiratory depression may occur with overexposure.
