NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) sections 3(c)(7)(A) provided that you:

1. Submit the data required by the deadlines listed below, from studies conducted in accordance with the Good Laboratory Practice regulations, 40 CFR Part 160, and the appropriate test guidelines as referenced in EPA's Data Requirements for Registration Regulation, 40 CFR Part 158.
  - a. Wildlife and aquatic organisms data required by § 158.490 by the dates required for reregistration.
  - b. A protocol for a leaching from wood matrix study within 3 months from the date of this notice of registration.
2. Submit/cite all data required for registration/-reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable response required for reregistration of your product under FIFRA section 4.

3. Make the labeling changes listed below before you release the product for shipment:

- a. Add the phrase "EPA Registration No. 31910-21".
- b. Delete the claim for control of termites. We do not believe that this product by itself will control termites. If termite control is specified by the EPA registered copper-based wood preservative, the claim for termite control must be limited to the copper based compound.

5. Submit one (1) copy of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

## STATEMENT OF PRACTICAL TREATMENT

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of egg whites, gelatin solution or if these are not available, drink large quantities of water. Call a physician immediately.

See Side Panel For  
Additional Precautionary Statements.

## DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

## PRESSURE TREATING WOOD

Use AQUATREAT DCD with a pressure process in one of dual treatments to treat timbers, poles, plywood, and other wooden items to assure protection from attack by termites, decay fungi and mildew. Treated wood may be typically used for decks, buildings, fences, poles, etc.

AQUATREAT DCD is used with a pressure procedure to treat sapwood to achieve retention levels of 0.2 to 0.6 lbs./ft.<sup>3</sup> of sodium dimethyldithiocarbamate (SODC).

AQUATREAT DCD should be diluted with water to less than 10% concentration as needed to achieve the correct concentration for sapwood penetration and retention.

If desired, compatible fire retardant salts can be added to the treating solution to produce fire retardant wood.

Maintain a pH of at least 9 during all phases of the treatment. Do not allow the pH in the Cell to drop below 7 because toxic and inflammable decomposition products may develop.

Do not enter Cell after treatment until Cell has been purged with air. Alternately, a face mask with separate air supply may be used.

AQUATREAT DCD pressure treatments should be done in conjunction with separate treatments with an EPA-approved, copper-based wood preservative to fix the AQUATREAT DCD in the wood.
