	**Technical Piperonyl Butoxide	1.25%
	Petroleum Distillate	7.56%
	Diatomaceous Earth	44.50%

INERT INGREDIENTS: 18.86%

\*\*Equivalent to 1.00% (butylcarbityl) (6-propylpiperonyl) ether and 0.25% related compounds.

EPA Reg. No. 32349-1

**CAUTION: KEEP OUT OF REACH OF CHILDREN**

See Other Precautions On Back Label

NET WEIGHT: ONE POUND

# PYRESAN 209

## STOP AND READ LABEL

- PYRESAN kills by dehydration, and is enhanced by promoting a physical-chemical action. Insects need not eat the powder; simply crawling over the dust is enough. PYRESAN may be used in accordance with directions in Homes, Restaurants (inedible areas), Stores, Hotels, Offices, Plants and Warehouses.
- PYRESAN kills and controls Ants, Bedbugs, Cockroaches, Silverfish. PYRESAN kills and controls Cat and Dog fleas. PYRESAN prevents entry of Drywood Termites.

## DIRECTIONS FOR USE

- Distribute PYRESAN at an approximate rate of one ounce per 50 sq. ft. — One pound per 1000 sq. ft. — in a visible film concentration, seeking always to search where insects and pests do not live or enter, hide and breed.
- ANTS: Distribute PYRESAN at an approximate rate of one ounce per 50 sq. ft. — One pound per 1000 sq. ft. Thoroughly dust ant trails, and areas around door sills and window frames, and in any location the pests enter the premises. Repeat treatment as necessary.
- BEDBUGS: Take bed apart. Dust joints and channels. Dust mattress, tufts, folds and edges. Treat picture frame mouldings, shelving edges, and around pipe openings, in cracks where insects may hide. Repeat treatment as necessary.
- COCKROACHES: (German, Brown-banded, Oriental) Apply a visible film of PYRESAN, at an approximate rate of one ounce per 50 sq. ft. — One pound per 1000 sq. ft. — on and behind all mouldings, shelving edges, and around pipe openings, in cracks where insects may hide. Repeat treatment as necessary.
- SILVERFISH: Dust bookcases, closet shelves, behind baseboards, windows and door frames and storage areas (attics) where books and papers are present. Repeat treatment as necessary.
- FLEAS: (Cats and Dogs) Apply powder to the animal, rubbing liberally to the skin. Begin with neck and include the underbody, legs, feet, base of tail. Repeat as necessary. Kennel surfaces should be dusted at rate of one ounce per 50 sq. ft. Heavily infested lawns, basements and crawl spaces should be dusted with PYRESAN 209 at rate of one pound per 1000 sq. ft. Repeat treatment as necessary.
- DRYWOOD TERMITES: To prevent entry of Drywood Termites, blow PYRESAN 209 through attic from crawlspace. Cover all wood surfaces. All vents and louvers on the windward side to be closed. Dust should be blown under house as well because Drywood Termites often infest wood members of the sub-structure. Use Rotary Duster at a rate of one pound per 1000 sq. ft. Repeat treatment as necessary.

## ENVIRONMENTAL CAUTIONS

This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning equipment, or disposal of wastes. Apply this product only as specified on this label.

## CAUTION: KEEP OUT OF REACH OF CHILDREN

Do not use in edible products areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed. Avoid inhalation. Avoid contamination of Food and Food Preparation Surfaces.

Do Not Re-Use Container. Destroy When Empty.
