"Water Treatment"

APPLICATIONS

ALGAECIDE PQ is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using ALGAECIDE PQ.

For pools having just visible algae growth add an initial dose of 50 to 77 fl. oz. of ALGAECIDE PQ per 10,000 gal. of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and filled pool, add initially 27 to 50 fl. oz. of ALGAECIDE PQ per 10,000 gal. of water.

To maintain pools of visible algae growth, subsequent additions of 9 to 18 fl. oz. of ALGAECIDE PQ per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of ALGAECIDE PQ throughout the water in the pool is necessary to maximum effectiveness.

ALGAECIDE PQ is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. ALGAECIDE PQ can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix ALGAECIDE PQ with concentrated dry or liquid chlorine products.

ALGAECIDE PQ

(POLY-QUAT)

FOR USE IN SWIMMING POOLS

CAUTION

Keep Out Of The Reach Of Children

COMPOSITION

Active ingredients

Polyoxyethylene (dimethyliminol)
ethylene (dimethyliminol) ethy-
lene dichloride) 15.0 percent

Inert ingredient

85.0 percent

NET CONTENTS--

EPA REG. NO. 32700-1

CAUTION

Keep Out Of The Reach Of Children

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food.

Rinse empty container thoroughly with water and discard or destroy container.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.
