***What are mildew & mold?**

Mildew and mold are fungus growths caused by dampness and warmth. These mold spores are in the air and grow in the form of white or greenish black spots where the dampness and warmth exist.

Mildew is not only unsightly but can cause a musty odor where it is allowed to remain.

***What is Ridd?**

Ridd Instant Mildew Remover is not a detergent nor cleaner, but is a mildew remover developed to kill mildew on contact.

***How to use Ridd**

Using adequate ventilation, simply spray Ridd on mildewed or molded area, let dry and rinse. Absolutely *no rubbing or scrubbing* is required! After a few minutes Ridd will cause mildew to disappear like magic! Some odor will be noticed, but this will vanish as soon as the sprayed area is rinsed.

Do not dilute Ridd or mix with other products.

*Please note further instructions on Ridd label concerning uses and precautions.

Thank you for purchasing Ridd!
