Nr. Michael Archer Howard Johnson's Enterprises, Inc. 161 Wisconsin Ave., Suite 4000 Milwaukee, WI 53203-2602

Subject: Amendment - Revise Statement of Practical Treatment All Season Distinon 5G EPA Reg. No. 32802-5 Your submission dated October 17, 1990

Dear Hr. Archer:

The amendment referred to above, submitted in connection with a registration under the Federal Insecticide, Fungicide, and Rodenticide Act is acceptable. Since you submitted only the page containing the revised Statement of Practical Treatment (indicated as page 16 of 17), I have made copies of your current submission and replaced page 16 of your original submission dated February 21, 1990 (which was accepted by the Agency on July 30, 1991) as that a complete stamped accepted label will be available for the Agency's files and for your records. In the future, please submit five complete copies of amended labeling for approval, plus an application form (or cover letter) noting the requested revision(s). The following revisions, in addition to those stipulated in the Agency's letter of July 30, 1990, should be made prior to release for shipment under the amended labeling:

- 1) In the new Statement of Practical Treatment, rearrange the order so that the advice is presented in the following order:
  - If swallowed -If inhaled -If on skin -If in eyes-

BEST AVAILABLE COPY

- 2) In addition to those crop/pest deletions specified in the Agency's letter dated July 30, 1990, further deletions/revisions are necessary due to recent modifications to Ciba-Gaigy's labeling:
  - a) Revise the "Timing/Special Directions" for the crop "onions" to read as follows:

Broadcast and mix into the top 3-4 inches of soil just before planting.

- b) For the crop "Sweet Potatoes", delete the directions for post-emergence application in the Southeastern U.S., since Ciba-Gaigy has elected not to support any post-emergence application to food crops for granular distinon products due to potential avian hazard.
- 3) In the Environmental Hazards text, add "For lawns," to the begining of the sentence which currently starts "Where irrigation (watering) is recommended".

A stamped copy of the label is enclosed for your records. Please submit five (5) copies of the revised amended label prior to release for shipment under the amended label. NOTE: When preparing your label, do not print the quotation marks that appear around revised text items specified in this latter. Please refer to the Diazinon Registration Standard, as amended, for release for shipment and channels of trade dates for diazinon products bearing appropriately amended labels.

Sincerely yours,

George T. LaRocca Product Manager (15) Insecticide-Rodenticide Branch Registration Division (H7505C)

# DIRECTIONS FOR USE AND CONDITIONS OF SALE AND WARRANTY

IMPORTANT: Read the entire Directions for Use and the Conditions of Sale and Warranty before using this product.

# Conditions of Sale and Warranty

The Directions for Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application all of which are beyond the control of \_\_\_\_\_\_ or the Seller. All such risks shall be assumed by the Buyer. Howard Johnson's Enterprises, Inc.

Howard Johnson's Enterprises, Inc. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the <u>Directions for Use</u> subject to the inherent risks referred to above. <u>Howard Johnson's Enterprises, Inc. makes no</u> <u>other express or implied warranty of Fitness or Merchantability or any other express or implied warranty. In no case shall Howard Johnson's <u>Enterprises, Inc. or the Seller be liable for consequential, special or</u> <u>indirect damages resulting from the use or handling of this product.</u> Howard Johnson's Enterprises, Inc. and the seller offer this product, and the buyer and user accept it, subject to the foregoing <u>Conditions of</u> <u>Sale and Warranty</u>, which may be varied only by agreement in writing signed by a duly authorized representative of Howard Johnson's Enterprises, Inc.</u>

\*Aids in control.

### Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

### Overall Lawn Application:

DIAZINON 5G controls the following lawn insects on Loth grass and dichondra lawns: Ants . Armyworms . Bermudagrass mites . Brown dog ticks . Chiggers . Chinch bugs . Clover mites . Crickets . Cutworms . Earwigs . Fleas . Lawn moths (sod webworms) . Leafhoppers . Millipedes . Sowbugs . Springtails (Collembola)

Precautions: Birds, especially waterfowl, feeding or drinking on treated areas may be killed. Apply this product only as specified on this label. Because of the migratory habits of certain waterfowl, do not apply in Nassau County, New York between November 1 and May 20. Do not exceed maximum permitted label rate; since rates above those recommended significantly ir rease potential hazards to birds. Avoid overlapping treated areas. If waterfowl, i.e., ducks, geese, can be expected to enter the treated area after treatment (except spot treatments), water lawn with at least 0.25 inch water immediately after application, however, stop watering before puddling occurs.

Apply DIAZINON 5G with a fertilizer spreader. See spreader setting chart below. Apply when grass is dry. Repeat as necessary.

For application with other types of equipment, apply at the rate of 2 lbs. per 1000 sg. ft. (an area 20' by 50') or 3.2 oz. per 100 sg. ft. (an area 10' by 10').

Billbugs; White grubs of Japanese beetle, European chafer, Southern chafer, Ataenius spretulus (dung beetle): Apply 2 lbs. per 1000 sq. ft. of lawn. Water grass thoroughly after application. For billbug control, apply when activity is first observed or when chewed or brown grass indicates damage from these insects. Repeat as necessary. For grub control, except dung beetle, treat any time between late July and early October. For dung beetle grub control, apply in Spring or early Summer when damage is first noticed. Water grass thoroughly with 1/4-1/2 in. of water after application. Treat again in late Summer or early Fall if a second generation occurs.

### Hyperodes weevils:

Apply 2 lbs. per 1000 sq. ft. of grass. Water grass thoroughly after application. Treat problem areas in mid-April and again in mid-May.

Spot Treatment

Ants: Apply 1 1/2 teaspoons of  $D \cdot z \cdot n$  6000 over and around each ant hill.

Fire ants: To aid in the control of fire ants in lawns and other recreational areas, apply 1/2 cup over, and 2 ft. around, each fire ant mound. Immediately after application, water in thoroughly. A minimum of 1 gallon of water should be applied to each mound area. Reapply as necessary. Apply gently to avoid disturbing ants. Use of high pressure watering equipment may disturb the ants and cause migration, reducing product effectiveness.

Note: For best results, apply in cool weather, 65-80°F, or in early morning or late evening hours. Treat new mounds as they appear.

BEST AVAILABLE COPY

Digger wasps: Apply 1 1/2 teaspoons of DIAZINON 5G in and around each nest opening. Apply at dusk when wasps are not active.

### Band Treatment Around House Foundation:

The following pests are commonly found around or near foundations of houses as well as in lawns. Certain of these pest. may enter houses.

Ants	Fleas
Brown dog ticks	Millipedes
Clover mites	Sowbugs (Pillbugs)
Crickets	Springtails
Earwigs	(Collembola)

Apply a 5 foot band of  $D \cdot z \cdot n$  6000 next to the house foundation. Distribute granules uniformly, using a rate of 3.2 oz. for each 100 sq. ft. of area (5' by 20') treated. Repeat as necessary.

Vegetables - Insect Control

DIAZINON 5G controls certain garden insects on crops listed in the following tables. Apply uniformly as directed for each crop. When a range of rates is given, use the higher rate only for heavier infestations.

Unless directions under "Timing/Special Directions" state otherwise, applications for control of pests listed below should be thoroughly mixed into the soil during or immediately after application.

Insect	Depth of Mixing or Incorporation into Soil
Surface cutworms*	2-3 inches
Subterranean cutworms*	3-6 inches
Mole crickets	1-2 inches
Root maggots	<b>3-4</b> inches
Wireworms	<b>4-8</b> inches

.

\*If type of cutworm cannot be identified, mix into soil 4-6 inches deep.

#### Storage and Disposal

Storage: Store in original container in a cool, dry, well-ventilated area. Store product in an area inaccessible to children and domestic animals. Do not store near fertilizers, herbicides, other insecticides, seeds, food, or feed.

-16-/()

18 2 19

Pesticide Disposal: Securely wrap original container in several layers of newspaper and discard in trash.

Container Disposal: Do not reuse empty bag. Discard bag in trash.

For minor spills, leaks, etc., follow all precautions indicated on this label and clean up immediately. Take special care to avoid contamination of equipment and facilities during cleanup and disposal of wastes. In the event of a major spill, fire or other emergency, call 1-800-888-8372 day or night.

# Precautionary Statements

Hazards to Humans and Domestic Animals

#### CAUTION

Harmful if swallowed, inhaled, or absorbed through skin. Avoid breathing dust and contact wich eyes, skin or clothing. Wash thoroughly after handling and before eating or smoking. May cause contact sensitization following repeated contact with skin of susceptible individuals. Avoid repeated contact with skin. If sensitization reactions result, consult a physician. Do not store near food or feed products. Food utensils such as spoons or measuring cups must not be used for food purposes after use in measuring pesticides. Do not contaminate ornamental fish ponds. Do not allow children or pets on treated areas until granules have been watered into the soil and the grass or soil is dry.

#### Statement of Practical Treatment

If on skin; wash promptly with soap and water. Rinse thoroughly.

If swallowed; call physician immediately. Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth if person is unconscious or convulsing.

If inhaled; remove victim to fresh air and apply artificial respiration if indicated.

If in eyes; rinse eyes with plenty of water and call a physician immediately.

# Note to Physician

This product is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

-17- /17

#### Environmental Hazards

This product is highly toxic to birds, fish, and other wildlife. Birds, especially waterfowl feeding or drinking on treated areas may be killed. Because of the migratory habits of certain Atlantic Coast waterfowl, do not apply this product to lawns in Nassau County, New York, between November 1 and May 26. Do not exceed maximum permitted label rates. Application rates above those recommended significantly increase potential hazards to birds and waterfowl. Avoid overlapping granules. Where irrigation (watering) is recommended in the directions or if waterfowl, i.e., ducks or geese, can be expected in the treated area after treatment (except spot treatment), apply a minimum of 0.25 inch of water immediately after applying this product. Stop irrigation before puddling occurs. Keep out of lakes, streams, ponds, tidal marshes and estuaries.

Do not apply directly to water or wetlands (swamps, bogs, marshes and potholes). Runoff may be hazardous to aquatic organisms in neighboring areas.

Shrimp and crab may be killed at application rates recommended on this label. Do not apply where fish, shrimp, crab and other aquatic life are important resources. Do not contaminate water by cleaning of equipment or disposal of equipment wash waters.
