Directions For Use (Cont.)

SURFACE FEEDING INSECTS SOD WEBWORMS, ANTS, FLEAS, BROWN DOG TICKS, CRICKETS, CHINCH BUGS, CUTWORMS, EARWIGS, SOWBUGS, ARMYWORMS

For control of Chinch Bugs, Sod Webworms(Lawn Moth), Ants, Fleas Armyworms, Brown Dog Ticks, Crickets, Cutworms, Earwigs, an Sowbugs apply this 50 pound bag to treat 25,000 sq.ft. of turf. Refer t Spreader Settings. Treat in the spring or when insects first appea troublesome and repeat as needed for control. Additional treatments a 30 to 60 day intervals may be needed for season long control of So Webworms. It is not necessary to wash granules into the soil for contro of surface insects

USE AS A BAND TREATMENT AROUND THE HOME

To protect the dwelling from possible insect infestations a band o granules may be placed around the building to control Ants, Brown Do Ticks, Crickets, Earwigs, Fleas, Millipedes, Sowbugs, Springtails an Spiders. On a pound of this product will treat a 5 foot wide band 100 fee long, arour . the home, (4 ounces will treat a band 20 feet long). This wil act as a brarier against insects invading the home. Apply the protective band when insects have become troublesome or before they caus problems in the spring or early fall. Repeat as needed for control.

ROOT FEEDING INSECTS

WHITE GRUB CONTROL IN THE TURF

For root feeding insects such as Billbug Larvae, and the "White Grub' larvae of Japanese Beetle, European Chafer, Southern Chafer an Hyperodes Weevil apply this 50 lb. bag to treat 12,500 sq.ft. of lawn Referring to the Spreader Settings Chart apply the granules uniform! over the area and follow with a thorough watering to wash the insecticid into the soil where insects are feeding. For best control apply when the grubs are young and actively feeding near the soil surface in mid July an early August. For the Hyperodes (Turfgrass) Weevil apply in Mid-Apri and again in Mid-May at the same rate as above. Consult you Agricultural Extension Service for the best time to treat in your area. Kee children and pets off treated area until grass is dry.

EUROPEAN CRANE FLY LARVAE
(Leetherjackets)

For specific control of the Crane Fly Larvae feeding in western state turfgrass apply 10 lbs. to cover 3,335 sq.ft. The larvae will also b controlled simultaneously when an application rate for Grubs (10 lbs 2,500 sq.ft.) has been made. Consult your Agricultural Extension Service for the best time to treat in your area. Keep children and pets off treate are until granules have been washed into soil and the grass is dry.

IMPORTED FIRE ANT

AS AN AID IN THE CONTROL AND REDUCTION OF FIRE ANT As an aid in the control and reduction of Imported Fire Ants by individua ant mound treatment apply 4 level tablespoonfuls (2/3 ounce) o granules evenly in a circle around the outer edges (1 to 2 feet from center of mounds measuring from 3 to 12 inches in diameter. Finish th treatment then by applying 2 level tablespoonfuls (7/3 ounce) sprinkle over the center of the mound. Best results will be obtained if mound i or, if allowed by State and local authorities, by burning. If burned stay be exposed to the insecticide treated area. Apply the granules when ant out of smoke have become a nuisance and repeat as needed but not more than once every 7 days.
