Thatch Penetration
In Turf

15 LBS TREATS
WHITE GRUBS -5,000 SQ.FT.
SOD WEBWORMS-7,500 SQ.FT.

TRICHLORFON 6.2 G

TURF GRANULES

FOR CONTROL OF LAWN AND TURF INSECTS SUCH AS WHITE GRUB SPECIES
SOD WEBWORMS, AND CUTWORMS

FOR USE IN HOME LAWNS, PARKS, APARTMENT & CONDOMINIUM COMPLEXES
GOLF COURSES, ATHLETIC FIELDS, AND OTHER ORNAMENTAL & RECREATIONAL TURF

Does Not Destroy Beneficial Insect Populations
When Use As Directed

ACTIVE INGREDIENT:

Dimethyl (2,2,2-trichloro-1-hydroxy-
ethyl phosphonate). 6.20%

INERT INGREDIENTS: 93.80%

Total 100.00%

KEEP OUT OF REACH OF CHILDREN

STATEMENTS OF PRACTICAL TREATMENT

SWALLOWED: Call a physician or Poison Control Center immediately. Induce vomiting by giving victim 1 or 2 glasses of water and touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious or convulsing person.
IF IN EYES: Flush eyes with plenty of water. Get medical attention.
IF ON SKIN: Remove contaminated clothing and wash affected area with soap and water. Wash clothing before re-use.
IF INHALED: Remove victim to fresh air. Apply artificial respiration if indicated. Get medical attention immediately.
NOTE TO PHYSICIAN: Prolonged exposure will cause cholinesterase depression. Atropine Sulfate is antidotal. 2-PAM is also antidotal and may be administered in conjunction with atropine.

SEE SIDE/BACK PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.

EPA REG. NO. 32802-___

EPA EST. NO. 32802-WI-1

NET WEIGHT 15 POUNDS (6.80 Kg)

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed. Do not take internally. Do not breathe dust. Avoid contact with eyes, skin or clothing. Wash contaminated clothing before re-use. Wash thoroughly after handling and before eating or smoking. Keep children and pets off treated areas until this material is washed into the soil and the grass is dry. Do not contaminate feed or foodstuffs. Do not use treated areas or clippings from treated areas for feed or forage.

ENVIRONMENTAL HAZARDS

Do not contaminate water by cleaning of equipment or disposal of wastes. This product is toxic to fish, birds, and wildlife. Do not apply directly to any body of water. Do not apply where runoff is likely to occur. Use only as directed on this label. Do not use on crops used for food or forage.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. STORAGE: Store product in its original container in a cool, dry, locked place out of reach of children. PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned stay out of smoke. HOUSEHOLD: Do not reuse empty bag. Wrap and put in trash.

SURFACE FEEDING INSECTS: Sod Webworms are capable of destroying large areas of turf. They live through the winter as a worm and change to a moth in May. Eggs are deposited very soon throughout the lawn and new worms hatch in May. By killing this first "brood" it is possible to reduce the worm population of later broods and therefore reduce turf damage.

HOW TO APPLY: Turf should be free of troublesome thatch which encourages insects. Rake or de-thatch the area and remove the debris to expose insect hiding places. Water the lawn and cut to proper height. Apply granules as recommended and sprinkle the area to move the insecticide down to the soil surface where insects feed.

HOW MUCH TO APPLY: For control of SOD WEBWORMS (Lawn Moth Larvae), and CUTWORMS apply at the rate of 2 pounds / 1,000 Sq.Ft. of turf. (15 lb. bag treats 7,500 Sq.Ft.). Refer to chart for respective spreader settings. Make sure your Spreader is calibrated for this product before application.

WHEN TO APPLY: Treat in the spring (mid-May to June) or when your "Lawn Program" calls for a Surface Insect control applications. Repeat as the program indicates or as needed for control. Sod Webworms may have 3 to 4 generations of larvae in 1 year which will require additional treatments at 30 to 40 day intervals during the summer months. Therefore repeat as needed for continued protection of lawn. Lightly sprinkle the area after treatment as soon as possible to move the insecticide into the zone of insect infestation. Do not allow children or pets on treated areas until material has been sprinkled in and the grass is dry.

EPA FILE SYMBOL: 32802-__ TRICHLORFON 6.2G TURF GRANULES

DIRECTIONS FOR USE (Cont.)

WHITE GRUB LARVAE CONTROL IN THE TURF

FOR ROOT FEEDING "White Grub" insect larvae of JAPANESE BEETLE, EUROPEAN CHAFER, & SOUTHERN CHAFER apply 3 lbs./ 1,000 Sq.Ft. of turf (15 lb. bag treats 5,000 Sq.Ft.). Make sure your spreader is properly calibrated to apply this product. Irrigate the turf after treatment as soon as possible to wash the insecticide into the root zone where the insects are feeding. Apply when the White Grub Larvae are young and actively feeding near the soil surface in mid July and early August. Consult your Agricultural Extension Service for the best time to treat for "Grubs" in your area. A second treatment at the same rate may be needed for mature large sized grubs.

HOW TO APPLY: IMPORTANT Do not attempt to control White Grubs in turf that has over 1/2 to 3/4 inch thatch build up since heavy thatch will prevent the insecticide from penetrating down to the area where the insects are feeding. Therefore troublesome thatch must be removed before treating for White Grubs. If thatch is not removed before treatment, poor "Grub" control will result.

The following spreader settings are for use with new equipment. Your used spreader may need calibrating. Since proper application is based on the spreaders condition with regard to age and use, your walking speed and the evenness of the terrain, your spreading equipment may require adjustments.

If you have reason to believe that your spreader is not calibrated correctly test apply by placing the amount for 500 Sq.Ft. into your spreader and apply to your pre-measured 500 Sq.Ft. (5 ft. wide by 100 ft long equals 3 passes with a 20 inch wide spreader) or by other suitable calibrating methods.

SPREADER SETTINGS			
SPREADER	AMOUNT TO APPLY	ROOT FEEDING INSECTS PER 5000 SQ.FT. 3.0 lbs./1,000 Sq.Ft.	SURFACE FEEDING INSECTS PER 7,500 SQ.FT. 2.0 lbs./1,000 Sq.Ft.
Scott ____	15 pounds	# 4 1/2	# 4
Cyclone ____	15 pounds	# 3 1/2	# 3

When using a 30 lb. bag; spreader settings will be the same as for the 15 lb. bag but it will treat twice as much Sq.Ft. as the 15 lb bag. These settings are based on a "Once Over" application.

NOTICE: Buyer and user assumes all risk and liability of use, storage and/or handling of this product not in accordance with the terms of this label.
